Thread: [HTML5 tag list?](#)

Omega - June 9, 2016, 12:18 pm

Does anyone know where to get an updated html tag list for html5? I am running into syntax errors with xhtml and also the previous gen tag <embed> has alot of flaws and isn't working well with its attributes and values. Help please!

I'd try looking at the PDF you can get on this

page:<https://www.smashingmagazine.com/2009/07/html-5-cheat-sheet-pdf/>

I'm a little busy at the moment so I didn't get a chance to look at it thoroughly but I think it might be able to help you out!

Look at the W3 Consortium official documentation to get all the information you want, since they are the official "producer" of this syntax and convention, you are sure to find every up-to-date information. <https://www.w3.org/TR/html5/>

The list on MDN is usually fully up-to-date. Probably the best place to start:
