Thread: [non steam crasher?](#)

hacksaw1 - June 9, 2016, 1:29 pm

Hi I am looking for a working nonsteam server crasher / booter or a recommendation of where to get one. I'm not looking for someone to DDoS the server for me, just wondering if there's anything else out there?

Public or premium :D

granz???????????????? - June 9, 2016, 1:31 pm

Just get a booter, routerslap should do the job.

hacksaw1 - June 9, 2016, 2:03 pm

Mission ago with routerslap you think?

Any idea what method would work with Routerslap? Critical boot had one specifically for Vavle attacks

update: Routerslap had absolutely no effect on the server

fidraly1 - June 10, 2016, 11:28 am

Just get a booter, routerslap should do the job !

hacksaw1 - June 11, 2016, 10:22 pm

The server has cloudflare so I would need a bunch of routerslaps at once to scratch it.

Any other ideas guys? PM me if you are interested but would like a monetary incentive

simmen - June 12, 2016, 3:30 am

cstress can take down cloudflare protected targets

hacksaw1 - June 12, 2016, 3:32 pm

I've seen mixed reviews about cstress and i'm thinking about trying the Premium package. I don't know whether the Cs server host falls under Large or Very Large servers lol

Don't get cstress!!!! Get vdos instead a booter that doesn't lie about their power.

hacksaw1 - June 12, 2016, 4:51 pm

I already contacted vdos actually and they don't bypass DDoS protection. Still waiting on my query from cstress support.

hacksaw1 - June 14, 2016, 2:22 pm

both cstress and restresser said their VIP level 7 accounts were strong enough to do the job
