Thread: [vote every 12h hack/trick?](#)

Ryuz4ki - June 9, 2016, 2:02 pm

hey guys,i play a game and that game has a votesystem on site for receiving some game coins,it is possible to vote more than once? thanks.

Is the app/game local or online. If its a phone app go into airplane mode and move the time forward 12 hrs vote, rinse and repeat. If its internet only idk

Frankey - June 9, 2016, 2:06 pm

If the app is a local app just turn off your wifi and set your time +12 hours. If it is online, you might need to change packets or something like that. It is really hars for an online game.

Ryuz4ki - June 9, 2016, 3:06 pm

its online, by now i discovered a way i have to make many accounts and vote every 12h and this working only with different ips for every account,should work with proxys but still i have to log in with 10-20 accounts to vote every 12h is hard but a way.. once i get 50 coins i can change them in game to be tradeable and then store them in my good account,wierd about this is that wont work with one account and different ips, on every account i have the timer to show me how much till next vote, i dont know any easy'er way i hope someone form here can help me a little thx ;)
