No longer selling for the time being may re start sales in the future!

[\$(5)\$] - June 10, 2016, 1:20 am

You should include some more information in your thread. What it does/doesn't include (generally) and the price you're asking (even if it's already in the title).

Good luck on sales with this.

?Criminal - June 10, 2016, 11:09 am

Bumpity bump pick this up guys!

Dreadmore - June 10, 2016, 11:36 am

Hey, do you have any vouch copys? I will write a detailed honest review.

Could do a discounted one manually for like 7 bucks just need to get something out of it but as far as flat out free nah I gave enough stuff out for free but who knows maybe if I make more ebooks if sales go well on this one in the near future I might do free vouch copies.

Sift - June 10, 2016, 8:22 pm

Bought this will leave a review in a bit.

libc - June 11, 2016, 10:31 am

Vouch for Criminal. He knows more about ISP doxing than anyone you'll meet.

Agonises - June 11, 2016, 10:48 am

Frequent poster in the Private Investigations and Anonymity section. Seems to have a great understanding regarding Doxing (of which ISP doxing comes into it). Good luck with sales nevertheless.

vouch for criminal has years of knowledge with isps :)

?Criminal - June 15, 2016, 1:05 pm

Bump guess no ones interested in this type of doxing but this ebook will always be here if anyone wants it though and an update will be pushed out soon been working on multiple different ebooks.

Plexcoo - July 6, 2016, 4:28 pm

Just got this guide and I'm reading it right now. This has a shit ton of juicy information you can use to ISP dox efficiently! Would definitely recommend this as a solution to ISP doxing!

1 Gun 2 Clips - July 6, 2016, 5:00 pm

Isp doxing has been dead for a while now.

It's mainly for beginners/intermediate theres stuff I cover thats not in the public domain and theres no real focus on it in terms of spoonfeed friendly guides this is the closest you'll find, theres tons of rehashed normal doxing ebooks but you won't find an ISP doxing one which is one of the motivations for creating it, it's a relatively untapped niche.

Correct most of these methods I had field testers extensively call in isps when I didn't have time during working on this ebook so every single method I written down was independently verified by me and a few testers it essentially means if a theorized method was tested and failed it was not merged into the final copy of the ebook, all methods currently in the ebook work as is so you shouldn't really need help it's self explanatory, hopefully you have decent social engineering experience going into the ebook because this ebook implys you've done it if not I recommend reading kevin mitnicks art of deception and a few other SE books before getting your hands dirty with ISP doxing.As for updates the ebook as a whole needs to get a bit more attention because as of now I have no motivation to overhaul it quite yet I have multiple drafts planned and I may merge it into a revised copy but for now ill see how things go.

Anything is better than AIOBuy. That shit is crashed 24/7.

John F. Kennedy - August 22, 2016, 10:00 pm

Are they up to date on what ISP tools they use and whatnot?

\$AMMi - September 19, 2016, 1:05 pm

Just finished this and wanted to say that it was a-lot more than i was expecting, i do i have to say im more confident in isp doxing HUGE vouch for this dont hesitate to buy this book

Linux™ - September 28, 2016, 9:44 pm

I've just bought this book, I can readily say if you've got any SE skills this will improve what you know by a land slide, I have experience with ISP doxing, and I can even say this book has material, and throws it into context in a way you won't be disappointed with. Good work Criminal.
