Thread: [It's killing me how users who scammed another users keep scamming](#)

Styll - June 10, 2016, 1:49 am

Well there's a user who scammed me in the forum.

I really thought he will get banned after i will open "Deal Dispute"

But nothing, he scammed me couple days ago.

And everyday he is coming up with the same scamming threads

"Two knives and good betting skins for sale! 60% BTC | Keys \$1.80 BTC |"

And closing the thread right away so no one will write he is a scammer and stuff...

if you want to know who i'm talking about... :

I think you guys should beware...

And... i just wanted to know how this thing works... how he is not getting banned?

After i've put all the proofs.

The sad thing is that he is keeps doing it.

Nobody gets banned from scam reports buddy. That's not how HF works.

So he will not get banned at all?...

Scam reports are to warn others, they don't get people banned. That's why so many uber members are able to go on scamming sprees, users don't check for open scam reports beforehand.

I know... i'm stupid too,

But, i really tought he will get banned tho...

I did a lot of transctions in the forum related to money...

And all the people i did exchanges and trades with, was pretty nice i even do with them exchanges on a daily basis.

And after that this dude, i trusted him and he scammed me..

But i learned something from this scam...

No matter what Uber/Leet/Epic...

200/500/100 Rep you can't trust!

Thank you for the responses...!
