Thread: [for my fellow HF members what do yall think about obama doing the kill switch on web](#)

bb123 - July 9, 2010, 1:18 am

he said that they are trying to make a kill switch for hackers if they try to do something what do yall think of this we must stop it if they are that's just what im saying but how about some of you guys and gals what do yall think.

david56543 - July 9, 2010, 1:42 am

wont happen.. to many businesses rely on internet lol

will NOT ever happen.

if it does ill kill obama lol

im sure /b/ will hunt him and shoot him too haha

K0FIN - July 9, 2010, 1:44 am

Dude this is like total bullshit. It could never happen, what the fuck is the Cyber division of the FBI gonna do? Or NSA Cyber warfare?

ianian112 - July 9, 2010, 1:59 am

No they are making a kill switch for national security, so if things really start to hit the fan they have a final fall back. Also if you read its for critical infrastructure to our government. The op portrays it as "OMG THEY HACKED INTO ONE OF OUR WEBSITE HIT THE SWITCH", when its more like "someone has hacked into telecommunications and recording every call, and rerouting our electrical grid"

"we must stop it" Yes all of us in the senate and house must stop the bill!!, this is not voted on by the people

botnous - July 9, 2010, 2:01 am

its a huge conspiracy man

reptoids man

illumanitu man

too much fucked up conspiracies

just a way to stop the education of this shit man smoke weed man

ThankYouAndGoodbye - July 9, 2010, 2:11 am

You can't make a kill switch for the whole internet because its dynamically routed through every country so all countries would need to comply - and if bp are pissing oil into the sea instead of turning of the oil pipeline for a day just because of the loss of revenue - I doubt other counties will submit to all of there countries e trade being turned on and off at will by a governing body. The internet can't just be tuirned off - even if ammerica turned of its back bone connection the connections would just be re routed through satalites as a fail safe or via othert slower undersea cables - that's what dynamic routing is .

bb123 - July 9, 2010, 10:33 am

well the new world order is already here i don't see why it can't happen i heard they hacked the

voting machines and made obama president but i don't know for sure and plus it is possible but they would have to be sworn to secrets-y

TheAxis - July 9, 2010, 11:15 am

It better not happen. Being able to shut down the internet is like silencing the press, which is against the constitution.

Royal - July 9, 2010, 1:16 pm

Sigh. Yes, this is most likely going to be passed. And to whoever said "it can't happen, it's impossible!" yes, it can and easily. All he has to do is send a Federal Order to your ISP and they'll shut down your service.

If you don't pay your internet bill, your service gets disconnected. That's exactly what would happen all over the US.

In wartime, the Constitution and Bill of Rights can be suspended if passed by Congress. It happened in 1942-1945 with the Japanese internment camp and could happen again.

RedPill - July 9, 2010, 1:22 pm

This has utterly nothing to do with the President himself.

Agent J9 - July 9, 2010, 1:23 pm

maybe big hackers of banks or something, not relatively local hackers like us, hacking small sites & such. No need to worry, & I doubt he could even do that.

Viral Dragon - July 9, 2010, 1:40 pm

Lol. My wife made a topic about this subject a while back. I don't really feel like copy pasting a shit load so I'll junk link you to the topic here: [Debate -Internet kill switch](#)

You guys can read through it for my answer.
or anothers.

-Viral.

Also you should go back & read my post, I said for hackers of banks Obama might shut their internet down, not us.

jfmherokiller - July 9, 2010, 2:17 pm

this is a way for obama to be the first black president assassinated.

Daylyt - July 9, 2010, 2:22 pm

Actually it was a (white, surprise surprise!) ultra-neoconservative bible-thumping senator that proposed this. It has to be approved before the house can even vote on it. Thankfully the republicans are clearly the "do nothing party" whom vote no against EVERYTHING...

and by everything, I mean each and every single bill that's been presented to them... this includes bills that are highly needed to fix the trouble their buddies from the Bush administration caused.

Ohhh a personal attack, you are pretty cool! I know that my registration date totally changed my previous post, but let's try to ignore that. You should read about a subject before posting, this isn't for shutting off an individual's internet, this is for shutting down broadcasting stations

Agent J9 - July 9, 2010, 2:56 pm

You should read about a subject before posting, this isn't for shutting off an individual's internet, this is for shutting down broadcasting stations what makes you think my post was regarding you anyway? I made a post in the open, not towards you or anything. This thread's about Internet, not broadcasting stations.

ianian112 - July 9, 2010, 4:40 pm

My cousin's a big hacker (240 pounds) and he doesn't hack banks. Dumbfuck.

(e1usive)D3viant - July 9, 2010, 7:52 pm

Obama is a idiot.

They also want to control internet limitations, what the gov't is trying to do now, is getting idiotic.

Friedrich Schiller - July 9, 2010, 10:09 pm

Lots of people take this out of context

Obama is implying a switch that shuts down networked systems connected to the internet that are important to the US government and its civilians

I'm sure CERT have informed him that it is not possible to shut down internet connections for an entire country

Daylyt - July 10, 2010, 8:27 am

"Obama" isn't the person bringing this bill to the house. That's the Senate's job. Things are split up and bad decisions are the result of overall failure and corruption in government at its core.

Neoconservatives are denying all bills in relation to the economy while giving tax breaks to a bunch of rich Jews. If they keep this up then YOU WON'T BE ABLE TO AFFORD INTERNET ACCESS ANYWAY!!

bb123 - July 11, 2010, 11:44 pm

well he is the president he can make anything happen at the moment lol it could happen soon but i don't see how it is possible to be honest it would take some major skill on that sh*t but yea these governments want to try and control everything but there are people who can stop them from doing it i heard and it's not dealing with the government at all it's dealing with the people that are getting pissed on what the government is doing they are already trying to depopulate half of the entire world from what i heard by the swine flew vaccination poisoning the world's food supply and alot of other ways but right now they think they are getting away with all of it i think it's wrong and im sure yall do to but it's alot of whats going on in the world right now what i think needs to happen is all hackers unite and do something about it but who am i kidding i can't do nothing about it im only a one man army so yea o well what do you guys think
