Thread: [Call of Duty 4 Remastered Opinions?](#)

Vape Lord Nord - June 10, 2016, 3:37 pm

So I love call of duty. The early ones at least. Call of Duty 4 and World at War were my childhood back in the day. I used to have all my friends and I hop on xbox360 and play things like SnD or Michael Myers even. I loved the game so much that I even played it when the newer cods were out. I just loved it so much. I ended up buying it on PC shortly after and started enjoying things such as CoD Jumper, Death Run, and Promod. The maps on that cod were endless and it was just so much fun. I really hope they bring everything back including strafes and mod tools for pc it was so much fun. They also better not put that gay high jumping shit in...

What's your opinion guys?

hey soul sister - June 10, 2016, 3:42 pm

CoD went to shit with Ghosts in my opinion. I wish that they would go back to more boots on the group type gameplay. I miss the days where there were no jetpacks and futuristic type things going on. I haven't bought a Call of Duty since Black Ops 2 and I do not plan on buying the new one. Even though you get MW1 remastered with it.

Cod went to shit after bops 2. I will find a way to get cod 4 remastered without buying star wars infinite warfare.

Is it sad infinite warfare has spacebattles and battlefront doesnt?
