Great list. You should make a forum/list where everybody can post a vulnerable link.

skidpaste dun goofed, i reposted the link in a comment on the first page

Aakash_Choudhary - June 27, 2016, 2:47 am

My advice not give complete list with union. just give site which is really vulnerable to sqli.

Those who want to learn let them find injection point themselves and when they stuck come here to get help.

Thanks
