Mine would probably be hitting rank 200 since i stopped playing after hitting 100 but due to the lack of games out right now that are fun, left me no option... 2.00+ K/D, Game of getting 121 kills, and maybe hero gear? Pretty nice being 33rd monthly man. Good shit.

Probably just getting Dark Matter. That grind was intense and rageful at times.

Getting Hero on everything and gold on everything except melee. I cannot deal with melee it's not worth it.

I was in the top 200 in Der Eisendrache when it first came out, That's the only thing and i also completed the Shadows Of Evil Easter Egg.

For me would be:

2kd+

Rank 500 in Safeguard

Was rank 300 in demolition

Rank 2000 in Kill confirm

Rank 5000 in Domination was about 4000

Rank 7000 in hardpoint was about 3000

And other shit, i was prestige 9 legit but got reset due to i done duplication (idiot move).

Now im prestige 5 with all them above :P.

So yea!
