WHAT KIND OF WEBSITE CAN I PROMOTE, AND WHICH ONES ARE NOT ALLOWED?

Although you are entitled to promote websites on almost any topic and content (affiliations, CPA offers, blogs, etc..) some restrictions are applied, and you cannot submit:

- Adf.ly, spam, Adfocus and similar services
- Pages automatically downloading any type of file without visitor consent
- Pages or websites that don't adhere to legal international regulations

- YouTube videos or channels (you can embed videos in your website without problems) - Pages using SSL (https) are not supported at the moment

CAN I PROMOTE AN ADULT WEBSITE?

Adult websites are allowed, as long as they abide by legal regulations for adult content websites.

Does the traffic just click on for a set amount of time, or will they go through the pages and use the website, wondering if this is viable for a blog

They are actual people, not botted or anything. They come to your website out of interest. Yes it's viable for a blog.
