Thread: [Free VPS Method - 1 GB DDR3 RAM - 8GB SSD](#)

[\$(5)\$] - June 13, 2016, 12:38 am

Hey upgraded members,

I figured it's time I give back to the community again!

I currently just found a method where you can get a free VPS for an ENTIRE YEAR for free through a host. This server is not affiliated with me or my host what so ever, it's just something I stumbled upon one day.

The server's specifications -
3.3GHz - 1 processors, 1 Cores / 2 threads
1 GB DDR3 RAM
8 GB SSD
1TB Bandwidth

If you're interested in obtaining this method, shoot me a PM (the fastest way).

Hermenaut - June 13, 2016, 12:42 am

I'll take that please. Thanks for giving out the method! Much appreciated.

EDIT: I received my method and just registered. I can vouch that I haven't previously known this and cannot be found on Google.

Thanks!

Registered one 3 days ago but still didn't get it, I was wondering how long it takes on average before you get the VPS delivered?

As stated in my PM to you multiple times now, you would need to contact their support if you have any issues with the server. I'm not the one providing these... sorta like me giving you a method for OVH and you contact me for issues with your OVH server. I know that this method does work and many other people within HF have been successful with receiving their server(s).

I've replied to all private messages. From now on - I am only replying to private messages in regards to providing people with the method. Let me know if anyone else wants it.

I think you are confusing me with someone else, this never stated in any of your PM's towards me. I was just asking what the delivery time was on average, I'm not saying you are the one providing the servers?

Ok same point still applies. Contact their support for questions or read over what it says in regards to how long it normally takes to provision your free server.

? States it right on their site. I won't be replying to posts on here anymore. If you have any questions, PM me.

Still giving this out. Let me know if anyone else wants it.
