stop posting this on all the threads, you need to either buy or hack some private dbs then trade
from there, you won't get anything by a simple google search

Simple google search: <https://archive.fbi.ninja>, it's down at the moment but the site contains lots of full dumps including 00webhost,xsplit,crackingforums,nulled.io, and even... and even...

He's just slow, he says "it's fake", then goes ahead and says "leaking db's that aren't private", he's all loopy in the fucking head.

No I'm just triggered by the fact that you're lying for no real reason, ion know what you searched but I searched most of their databases and correct info 80% of the time.

Op if you can pm me more info about this, this seems really interesting to me.

Sift - June 14, 2016, 5:59 pm

Still doing this, note I'm not giving out databases I'm giving out lookups.
