v=1](https://www.dropbox.com/s/7sw2y1un2ufuhk0/iOS_beta_Configuration_Profile.mobileconfig?dl=1&pv=1)

1. Click link
2. Follow it and accept, reset phone
3. Go to General>Software Update and wait for it to load
4. Install

Also, if anyone could upload a mirror for these where it won't get taken down please do!

Thanks for the link, just updated my device to iOS 10.

[Rn] 7s^2 - June 14, 2016, 10:10 am

I got an iPod touch 4G, will this method work for my device? They also got iOS.

Anyone tried this? I don't want anything happening to my phone. Please give me reviews!

RumbleFrog - June 14, 2016, 9:58 pm

Neat, no need to restore from ipsw file, just update

M0NST3R EN3RGY™ - June 14, 2016, 10:03 pm

What if you want to go back to what you had before? I'm guessing you have to restore?

Dan Smith - June 15, 2016, 3:51 am

Is iOS 10 decent so far? No issues with ridiculous battery draining like in other betas?

Wyle - June 15, 2016, 8:58 am

I tried updating it but it's not even working, it says "Verifying Update" but it gets stuck on there so I'd have to reboot my phone.

Got this from a close friend:

None of them are trustworthy, period. Any source that gets you the dev beta without the public beta, without adding your UDID will likely result in your device at one point being bricked. They usually fix the bug with the second beta, meaning you'll have to restore your device or get someone to add your UDID to their account.

It's a matter of knowing someone who would add your UDID to the dev kit they have.

Ezio. - June 15, 2016, 12:51 pm

I can vouch and everything worked fine.

OneEightSeven - June 15, 2016, 12:54 pm

ios 10 is very neat i like it but I feel like I should of waited to upgrade. obviously its in beta and some apps crash on me

Lana Del Rey_ - June 15, 2016, 12:59 pm

Upgraded to the iOS 9 beta and I regretted it. I'm going to wait this one out and wait for the final release. Does anyone know when the final release is going to happen?

Installing this right now. Will an iPhone 6 support iOS 10 well?

Better to get your UDID registered as it asked for activation last time I installed a beta back on iOS 7.

Weird it never ask for registration on past 3 betas

Aerospace - June 15, 2016, 5:36 pm

Trying this out now! Thanks for this man.

Yin Yang - June 15, 2016, 6:34 pm

Thanks for this, I was able to install it successfully. I tried the draw art for texting, but it failed to send. I'm assuming only people with the beta can get it?

I just downloaded it as well. That is a correct assumption. People will not be able to see the new features unless they also have IOS 10 installed.

aceyx3 - June 15, 2016, 7:48 pm

Hey, thanks! I'm on 5s, will it work?

?Fetz? - June 16, 2016, 11:23 am

Will you get the beta updates with this?
