Thread: [\[Blockchain\] Receive Confirmation Faster. Push Bitcoin Transaction](#)

Valak - June 14, 2016, 9:04 am

Have you ever had the Problem that you've send or receive a Bitcoin Transaction and it didn't receive Confirmations?

<https://blockchain.info/pushtx>

Go there and push your Transaction faster here.
Had a 8.4 Bitcoin Transaction and it got pushed very fast with it.

UPDATE: you have to use the HEX CODE of the transaction!
Append "?format=hex" to the end of the URL to display the HEX code and paste it in the Link provided!

Cryptic™ - June 14, 2016, 9:07 am

That's interesting. Is this a new feature?

The GRim - June 14, 2016, 9:09 am

Can you please push this transaction?

<https://blockchain.info/tx/1e4541d02e6228d59d7f9a549308bbc67e5b405c5f345aae20770659dd82c299>

Jillie Boe - June 14, 2016, 9:13 am

Interesting. When did they add this feature?

Valak - June 14, 2016, 9:16 am

It re-broadcasts it, it's meant for offline transactions to be pushed but works perfect with the normal ones

<https://blockchain.info/tx/1e4541d02e6228d59d7f9a549308bbc67e5b405c5f345aae20770659dd82c299?format=hex>

Pushed your Transaction now Grim.

Can't be used with transactions sent from the online wallet provided by them, it has already been 'pushed' by them.

Valak - June 14, 2016, 9:21 am

It is on Highest Level already then.
Also remember to set a high tip for the transaction!

Threshold - *June 14, 2016, 11:57 am*

That feature is just to broadcast a transaction on the network, it doesn't make it be confirmed any faster...
