Thread: [// CASH OUT // SELL YOUR SKINS // || INSTANT TRADE || \ 64% \ EASY TO USE \ BTC \](#)

**S. Koda** - June 14, 2016, 11:36 am

Here it is, the FIRST ever AUTOMATED skins buying bot!

Using our bot is just a piece of cake!

1. Send a trade offer using it's [trade link bot 1](#) OR [trade link bot 2](#). \*USE A BOT THAT IS ONLINE
2. Put in your BTC address in the comment section of the trade. <-- Don't forget this step!
3. Accept your trade offer using your phone, NOT e-mail.
4. When you have done this, our bot will send you the BTC.

We are currently NOT buying souvenir skins, if your trade contains some of them it will be declined. You can send a trade offer again without the souvenir skins which will be accepted then.

Buying at 64%!!!

We are buying at 64% whenever you have joined our [steam group](#), the skin is worth at least 0.1\$ and you have CSGOIO.COM in your steam name!!!

Skins that are worth less then 0.1\$ will be bought at 10% (or 12% if you join our steam group, or 15% if you also have our website address in your steam name).

Stattrak knives will be bought for 55% max!

Should you not join our steam group and your skin is worth more then 0.1\$, you will get 59% or 62% according to what you have done to get extra percentage.

Feel free to visit our official website: [csgoio.com](#)

And you can also view bot 1's steam account right here: [Skins Buying Bot #1](#)

Or try and view bot 2's steam account right here: [Skins Buying Bot #2](#)

Or if you think this ain't working, check out [one of our storage bots!](#)

vouch for s. koda, legit bot and very fast

**Mangekyo** - June 14, 2016, 3:12 pm

Does it take cases and souvenir skins?

Edit: Sold a few cases, but still haven't received my BTC. I put my address in the comment section of the trade too.

You should have received your BTC worth 0.1080\$

Let me check that for you

<https://blockchain.info/tx/a2d7a05bbdce260305b4ccf74fe597e98b8058e9cd9f5159bd877f951bbcf9>

You have received the BTC, however it needs some time to confirm the outgoing BTC ;)

But to clarify, yes we buy almost anything except the newly released weapons.

**ChickenNoodle** - June 14, 2016, 4:33 pm

Might use this in the future when I need it seems cool.

**HerrGee** - June 14, 2016, 4:42 pm

Is it possible to see how much the bot will send and how much the bot values the trade for before accepting it?

**Mangekyo** - June 14, 2016, 8:25 pm

Vouch, got my BTC after sending cases. Thanks!

**zachdime** - June 14, 2016, 8:57 pm

I just sold some items to test it, but havent received any BTC yet. Will update later.

EDIT: I've been paid. These folks have good support! +vouch

**grady** - June 14, 2016, 8:59 pm

I've wanted to do something like that, the issue is I only really want specific skins.

I might do something like this with keys doh.

Plenty of keybots exist, pretty sure it's really easy to set up

(Jun 14, 2016 09:05 PM)Yani Wrote: [\[CITE\]](#) Bot might be offline as its name does not include the buying price.

Currently it's saying "BB" while it should normally say "b @ 60%".

Skoda is currently offline but I'm sure he'll check what's up as soon as he's around. I understand that, but then why has the trade been accepted if he cant payout?

EDIT: I've been paid. These folks have good support! +vouch

**S. Koda** - June 14, 2016, 9:25 pm

Almost all pending trades have been accepted and all BTC has been sent.

Bot crashed over night and will be up soon again.

(Jun 14, 2016 04:42 PM)KissaPåKatten Wrote: [\[CITE\]](#) Is it possible to see how much the bot will send and how much the bot values the trade for before accepting it?

At the moment this isn't possible automatically by the bot.

I suggest looking for your item(s) on steamanalyst.com.

And then take preev's price and calculate 60% of their price.

This will give you a nice example of what you should approximately get.

**michael91901** - June 14, 2016, 10:01 pm

Was honestly skeptical as fuck about this because 1, Ive never heard or done this with a bot before, 2 it is a new service, but this is 100% legit and I got my btc rather quickly,

vouch, good service. Will be using this again in the future.

**Helmerz** - June 16, 2016, 12:38 pm

vouch for this because this bot worked for me, I will be definitely using this bot in the future. Thanks!

**PlatinumD** - June 16, 2016, 5:08 pm

Tried it with some shit skins and didn't get anything back, but it was probably too low because it was mostly stickers and random low tier weapons. Nice concept though good luck OP!

Edit:

Nevermind it got sent back to me apparently will try again with different skins ?

**PartTimeNinja** - June 16, 2016, 5:14 pm

Vouching for this, just tried it and got the payment within seconds. Cool bot :)

**7even** - June 16, 2016, 5:16 pm

Currently we do not support this feature and this will probably not be integrated too.

We have been thinking about what we wanted for this project and TF2 and Steam items were not on our list of being in our interested at this time.

Whenever this should be integrated I'll let all of you know.

The bot has more than enough BTC to buy you out (unless you are PhantomL0rd and wants to cash out).

At all moments we try to put in around 2-3 BTC which should be enough.

If the balance of the bot is less then a certain amount in BTC it shuts itself down.

Should the bot not have enough BTC to buy your skins, the trade will be declined by our bot. But keep in mind there is always around 700-1300\$ on the bot.

**S. Koda** - June 24, 2016, 1:46 pm

Also if I forgot to mention, the bot would even buy skins worth less then \$0.03

It's because you didn't read the instructions to use the bot.

Your account and inventory were set to private.

If those or any of both is set to private, the bot declines the trade.

This is why it kept declining.

If you want to use the bot, put both on public and after the trade you can set them back to private.

Should you have any more questions, feel free to ask me

Either you forgot to add your BTC address in the comment section of your trade or you need to try again.

If that was you sending an AWP Pink DDPAT BS your trade timed out and that way it got declined.  
Simply trying again should fix this issue.

I can not see a trade offer that has been declined for around 8\$ of skins.

We take average prices.

We get them from steamanalyst, steamlytics or csgofast.

Mostly used by many is csgofast so you can base yourself on that one.

Bitcoin price is taken from blockchain.

And how do you know how not to get ripped off?

We get around 600 to 1000 trades a day when the bots are online and we offer support trough our steam group.

Looks like you don't read the thread.

+2% to join steam group.

+3% when you add CSGOIO.COM in your name.

It really is common sense to read everything trough.

But just as all the 'Terms of Sale' nobody read it trough.

The most used out of 3 api's is api.csgofast.com

Either way a secondary bot has been launched and should be able to trade between now and a couple of hours as at this moment it seems to be declining every offer.

Should anyone has a question, feel free to ask away.

How many items can I send to the bot at once?

We have put a limitation of 50 items at once to our bot. This is because the steam API would otherwise time out our request and would queue all future trades up.

We have lowered the percentage to 64% due to the closing of dota2lounge.

We have also made it so that stattrak knives will be bought for a maximum of 55%.

I guess I have answered this before as well but I'll tell you.

It's because of a bad http error on blockchain's end that tells the bot the btc address used isn't a real bitcoin address.

There is clearly nothing I can do about that.

Even though, we are looking for another way to confirm the legitimacy of a blockchain address because this issue is also a pain in the ass for us.

Sorry for my late reply.

The bot wasn't accepting your trade offer because of the steam trade servers being offline.

There has been an announcement about this.

You can still use the normal trade bots.

Make sure to read the usage information on their profile.
