Site Needed for: os-scape.com

I need a voting bot that uses a proxy list or something like hide my ass vpn which allows for changing of I.P I need it to vote constantly to get multiple votes and putting them on the account and claiming.

I will pay: 50\$ or just give me an estimate of the price you think is worthy.

I know but I thought for that all you would need to do is add the login info on it. I have like 10k caps bought already.

This is a bot I had for IKOV just as an example.
