Thread: [iSpy Keylogger || Live KeyStrokes + Unicode || Recovery || Walkthrough || Video](#)

GearCEO™ - June 14, 2016, 11:45 pm

Hi, this is Officially release video tutorials of iSpy Keylogger. If you have any issue with that then please post here. Don't post in sales thread. Before posting here, please take a look all videos carefully.

Sales Thread: <https://hackforums.net/showthread.php?tid=5129812>

How To Configure iSpy Keylogger With Email

[Video: <https://www.youtube.com/watch?v=WHKZRnMp4Nk>]

Troubleshooting - F.A.Qs

=====

Q: Why I can't send test email? Make sure your STMP Server and Port is correct.

Make sure your password is also correct.

Please check your security settings of your email provider.

Q: Why am I getting error (The SMTP server requires a secure connection or the client was not authenticated. The server response was) while sending test email?

This error occurs When the password is wrong / incorrect

When you try to login from some application (like HawkSpy Products)

When you try to login from the domain other than your TimeZone/Domain/Computer

How To Fix? Make sure you enter the correct password

In Most reasons, you must login to your account with your browser (Firefox, Chrome, Opera etc) and go to your security settings from the [LINK](#) then ENABLE or TURN ON less secure apps. So that you will be able to login from all applications.

You need to review the activity but reviewing the activity will not be helpful due to latest security standards the link will not be useful. So try the below case.

Or You have to enable login from other TimeZone / IP for your google account.

Q: When I test my iSpy Keylogger's server on my PC, it won't recover passwords? Make sure you ENABLE the recovery feature in iSpy Keylogger

Make sure your browsers / email clients have already saved passwords.

Make sure you UnChecked Clear Browser Pass which can be found in General Tab on the left side.

Q: How do I clean my PC after testing the server?
Use Vaccine TAB located above and press Clean Now button

Q: Why I only got notifications from victim PC?
This can cause Your server may be detected by Antivirus

If you sure antivirus is not installed then make sure you enable the necessary feature or use default settings

Or your victim has too much slow internet speed

How To Configure iSpy Keylogger With FTP
<https://www.youtube.com/watch?v=hIVErX08g1I>

Troubleshooting - F.A.Qs

=====

Q: Why am I getting (The Remote Server Returned An Error: (530) Not Logged In) error while sending test ftp method?

This error cause you entered the incorrect password.

How To Configure iSpy Keylogger With Web-Panel
<https://www.youtube.com/watch?v=bJrJcl21qkc>

Troubleshooting - F.A.Qs

=====

Q: How do I solve [THIS ERROR](#) while setting up the Web-Panel?

This is because you just renamed the panel folder to something or didn't put the panel folder on root.

EXAMPLE 1: IF YOU RENAMED THE PANEL FOLDER TO SOMETHING

<http://www.yoursite.com/something>

instead of

<http://www.yoursite.com/panel>

then do the following:Go to the panel folder and locate .htaccess file and edit with notepad or notepad++

Now find this line "RewriteBase /panel" without quote

Replace with "RewriteBase /something" without quote

EXAMPLE 2: IF YOU DIDN'T PUT THE PANEL FOLDER ON ROOT

<http://www.yoursite.com/university/assignments/panel>

then do the following:Again go to the panel folder and locate .htaccess file and edit with notepad or notepad++

Now find this line "RewriteBase /panel" without quote

Replace with "RewriteBase /university/assignments/panel" without quote

Q: I didn't find .htaccess file in panel folder?

Please enable hidden file option in File Manager from CPanel

Q: I didn't find .htaccess file in panel folder?

Please enable hidden file option in File Manager from CPanel

Q: I setup the Web-Panel successfully, now where do I find the panel key?

Go to your Web-Panel Account Settings and check the upload key panel on the right or please see the video tutorial carefully

Q: While registering the Web-Panel, I didn't know the HWID?

Just put random numbers and letters

Q: Whenever I click the logs in my Web-Panel, it pop-up [THIS ERROR](#) instead of showing the logs?

Please find main.php in controller folder and delete all code inside and replace with [THIS CODE](#)

packetsfam - June 15, 2016, 6:24 am

Very nice tutorial/troubleshooting FAQs mate.

GearCEO™ - June 18, 2016, 6:53 am

Thanks, today I will be updated FTP and Web-Panel method as well.

gilles - June 19, 2016, 3:28 am

Is this free / Paid? doesnt say in thread..

Anonymous, I would like to purchase the iSpy Premium Diamond Pack,
I have added you on Skype but you wont come online.

I cant send you a PM because of the 25 quality posts requirement.

Please how do i go about the purchase?

Are you using VPN? Please contact me over skype for further assistance.

Muzzi - August 13, 2016, 2:02 am

@?n?ny???? Please PM me your active IM's, I need to chat with you regarding the Keylogger.

I added you on skype a long time ago but you wont come online...

P.S PM me ASAP.

Xshocker - March 14, 2017, 9:09 am

So i recently bought gear informer keylogger and it does not seem to work it launches net seal and then just does not open the keylogger anyone else having this issue?

bawsyfella - March 14, 2017, 10:43 am
