Thread: [Very Simple Python Question - REWARD](#)

ROI - June 15, 2016, 9:05 am

I installed Python 3.5.1 and can't find Visa Library packet.

I know this rather vague, but I'm new to this.

Can anyone help me out?

Goodies - June 15, 2016, 10:52 am

In an administrative CMD:

Code pip install -U pyvisa

Then, in python:

Code import visa

Thanks a lot for the response. I've already done that.

This is the error I'm getting:

Please see the error message above. It is not a no matching architecture error to my knowledge.
