Thread: [\[FREE\] RAT Mentoring - Personally Teach You About Ratting! One-on-one!](#)

DI?E - June 15, 2016, 9:21 am

I decided I would start one-on-one lessons with some of the members here. I am doing this in my spare time. Leave a message below and shoot me a PM with your contact details. I will cover any questions you may have and help you setup any tools you are using as well as answer your questions to the best of my knowledge.

Those who want to contact me download Tox (<https://tox.chat>) and send me your user ID. I don't use skype.

Appreciate it. Been around the forums since 2010 so I have a pretty solid knowledge of RAT's and crypters.

Nice thread Op. I hope you have people biting off your hand for this kind of service for free. Trust me people this guy knows what he is talking about.

Don't hesitate to ask this guy to share his knowledge.

I'm sure you won't regret it.

Do keep in mind this is a free service, don't spam him guys!

Emrys - June 15, 2016, 3:05 pm

I've had some great knowledge with rats, but would you be able to help me understand more about crypting? (If that's something you'd also be into doing?)

I currently have a few paid crypters and want to try the best settings for a stable FUD.

Let me know! If not, still a great contribution to the site!

a s t - June 15, 2016, 7:04 pm

Vouch for OP he's a chill dude and knows his shit ?

This has been asked countless times. What is best in my opinion is just my opinion. So there really is not an answer to that question.

I will send you a private message. It looks like 7haz.onion is starting to get trickier, and trickier. I do not believe it will be long before they try to hunt me down. I will need to get them before they can get to me.
