Greetings HackForums, I have finally decided to release my Offhost Battlefield 4 Aimbot/Wallhack/NoRecoil tool.

Guaranteed Features

Aimbot + fully tested & undetected bypass.

Wallhack smc (No lag).

Chams.

No Recoil (100% Accuracy).

CPUKey authentication that is nearly impossible to crack with TCP socket server and php panel included link to socket server.

Netseal Secured.

All data transferred between client and server is encrypted.

Ability to connect to console

Realtime console screenshot option.

Reboot console option.

Shutdown console option.

Price is \$10 BTC

To purchase, please pm me.

TOS:

- 1) You are to absolutely NOT release the program under any circumstances. (Even though there is auth)
- 2) You (buyer) may not change your CPUKEY to the program; unless a mistake at purchase was created. (Exceptions can/may be made)
- 3) Absolutely NO refunds ALL SALES ARE FINAL.
- 4) Be happy that you are wrecking everyone in the game :)

Yup looked over it, I skimmed the post, I was actually interested so I'm not just some faggot who tries to get his post count up.

I'd like to know the ban rate for this

I just got done talking too him on an alternative site and he stated that his developer is working on a fail-safe for profile bans alongside MachineID (SMC) spoofing. I'm going to purchase the tool tomorrow for sure.

Random: Also, this is an off host tool by default because there's dedicated servers on BF4 of course.

Do you have any screenshots showing the 'Wallhack'?
Or maybe a video showcasing the 'Aimbot'?
