Thread: [Host allowing IRCD Botnet.](#)

Tex. - June 16, 2016, 7:21 am

Hello , how it's title i'm interested for a Hosting Provider, who allowing for host a IRC Botnet on VPS.

I tested BlazingFast.IO(Got suspended),OVH(Same suspended).

Preferably payment method with PerfectMoney.

Regards.

etizolamvondor - June 16, 2016, 7:25 am

blazinhositing.net

They allow hosting of botnets for 10 dollars/m BUT Do not use ddos scripts or else youll get the message i got and my vps suspended :p <http://prntscr.com/bh4o9l> although you can use pma

rootcity - June 16, 2016, 6:42 pm

nigga, i had my shit on fucking hosterdaddy for months. never got suspended

Allencook - June 16, 2016, 7:58 pm

I wouldn't be surprised if you got it working on SPAM. Their staff pretty much just gave up.

Put a super pause button to your roll , you suggested the most bullshit.

OP send me a PM I can suggest you a good host that was live field-tested.

As far as I know SPAM wouldn't work.

Most botnets GET request gate.php and read the response body.

The thing is SPAM randomly adds Javascript to the body of the response which intercepts with the botnet, thus you cannot send tasks to yours stubs.

wholesaleinternet.net = easy hosting thats cheap and allows any kind of botnet tested by me

Goldmouth - *June 17, 2016, 7:18 am*

Change your bots Ident, and nick to something like PC name. Dont make it look like a botnet. Set a BS topic and that will make it harder for them to ban you or wont at all. If you have source to your irc bot, change these thing ?
