Where are the forums to talk about music?!

Well why is hackforums even focusing on music? Exactly why it isn't shown on the front.

Don't put doubt in your post if your trying to prove something or if your asking for something.

I think this is bad idea because there are already 2 places to talk about it.

If we put the music forum in the lounge, we might as well put every forum in the lounge. If people want to discuss music, they'll go to the music forum.

There already is one under, "Freaky Files." Why would we need another?

At this time I'm denying this forum.
