Thread: [How to do special characters](#)

.Reef - June 18, 2016, 10:55 am

How do people use special characters to make their username look the same as someone else???
I'm stupid I know help

Eddie - June 18, 2016, 10:56 am

Same :(

Can anyone do my name as a special character?

Eddie

.Reef - June 18, 2016, 11:00 am

Someone pls help us lol we need help

Jesus666 - June 18, 2016, 11:01 am

I might think this is what you guys are looking for

<http://www.theworldofstuff.com/characters/>

I googled

"special characters that look like letters"

:)

Niko - June 18, 2016, 11:09 am

If your talking about an invisible character, just copy whats between the brackets and shove it anywhere in the name

Code []

Code []

Are you condoning the illegal use of invisible characters on the web?

D?ath - June 18, 2016, 11:21 am

give me the name you wish to use.

I reccomend looking up a cyrillic alphabet.

/gamegeekl - June 18, 2016, 3:03 pm

Here's a fun one for unicode:

<http://qaz.wtf/u/convert.cgi?text=ANOTHER+ONE>

yotoprules - *June 18, 2016, 3:45 pm*

??????????

haha nice tool gamegeek

Febreze - *June 18, 2016, 3:48 pm*

There is only google and alt+num pad

my favorite = ?>
