Thread: [YayHar | Feedback | 1 Year](#)

It doesn't feel like a year since I joined to be honest.
Where do I start?

I'll start for why I came here:

I came to HF just to browse and not really learn anything. I saw what Hackforums had to offer and made my first thread.

"help - chrome wont let me download njrat"

Yes, I know, very cringe.

Over time, my whole demeanor changed and I am no longer "help pls"

Hackforums in general is just a great place to be. There is a TON of helpful members and a TON to learn. It's taught me so much and really changed my life.

I'm going to keep it short, so let's go to member shoutouts:

Armada - This guy was the first guy to give a shit about me. I was a random member and he talked to me on skype and was really nice overall.

Mr Robot - You're that dude, very helpful.

Zayzo - His threads say enough

Omniscient - Even though you admit to not liking me, you're still a good guy. 2 repkills for asking questions, but I still admire your work and all the energy you put into Hackforums.

Not much to reply to here, but I will say that I agree.

When I first joined I was all "Help plz, free h4x for me" kind of guy.

But now it feels good being able TO help.
