Thread: [Hash - MD5](#)

Uploader.sx - June 19, 2016, 12:53 pm

Hello, I need help cracking 2 MD5 hashes.

9f056e2e5e7c5b778d719cb6358a2b05
dbee776b8a7a7ef429580b37c8a22a9c

If someone can crack them and guide me to a useful tutorial, I would be so grateful.

Thanks??

This tutorial: <https://hackforums.net/showthread.php?tid=4587445>

by w34k should explain everything on setting up hashcat so you can do these yourself.

You can also get password lists from:

<http://weakpass.com/lists>

and

<https://crackstation.net/buy-crackstation-wordlist-password-cracking-dictionary.htm>

Hashcat is outdated on my Kali Linux, and its not getting updated, could anyone crack this for me ?
I need it urgently, thanks
