Thread: [VisualProtector 0.6 | FUD | 25+ Features | AV Scanner| Updated 10/1/20 | Free License](#)

VisualSoft - June 21, 2016, 12:33 am

VisualProtector is now open source: <https://hackforums.net/showthread.php?tid=5349946>

Please be advised to not use VirusTotal as a scanner.
There are many free ones available.

<http://nodistribute.com>

<http://pscan.xyz/>

<http://scan.majyx.net/>

<http://ziscan.com>

Currently the Crypter is open source (old version). The source of current version is clean and can be viewed under reflector if any one like to have a look into it ?

To protect my crypter from leechers I have added HWID Protection to the crypter, you can open the

crypter and have a look over it without any issue, but to crypt any file you will need to have your HWID registered with me. For that you will have to download HWID Grabber tool from below and run on the PC where you want to use the crypter. It will give you your HWID and you need to post it here or PM me to get your HWID activated.

HWIDGrabber: <http://j.gs/8LBp>

VisualProtector: <http://j.gs/8LKx>

How to get your License and Stub?

- Just PM me or Post here Your HWID and I will Pm you Direct download link of stub with license.
- If you are not Upgraded user then you can get your copy from here : <http://j.gs/8LBh>

Note:

- VisualProtector is used to protect files which are mostly flagged by many AV, so the builder and the stub will eventually be detected by many AV's.
- VisualProtector's real-time notification only informs you about new updates available for the crypter and the stub, It has no auto-download or auto-update feature.
- Every thing is well explained on the thread and if you still do not trust my software, then do not ask stupid questions or make stupid questions or make stupid threads, just buy some paid crypter, this free crypter is not for you.
- In order to use VisualProtector, your account must be at least 1 months old and have positive reputation.
- I have the right to deny any user without any explanation

I don't have an a/v and firewall and defender are disabled on a service level, as in I don't have any of that. Weirdly enough it works perfectly in sandboxxie.

- Multiple injection Options
- File Binder
- Icon changer
- Assembly cloner
- Startup with custom Key name
- Injection persistence
- Protect Process
- Delay execution
- Auto-Update
- Free Scanner (using pscan.xyz API)
- Real-time News from coder
- And many more

How to get your Copy?

- Just PM me or Post here and I will Pm you Direct download link.

If you are not Upgraded user then you can get your copy from here :

<https://hackforums.net/showthread.php?tid=5259115>

Note: Crypter will install itself in Appdata and add itself to startup. As its required for Real-time News and Update feature of the Crypter. For more info refer to :
