Thread: [EsportsPlus - Win CS:GO Skins, Riot Points & More.](#)

Hunter398z - June 21, 2016, 12:03 am

Today I'm sharing with you guys a website and app that I stumbled across:

<https://www.esportsplus.me/intro>

This site is similar to CSGOLounge/Dota2Lounge in the betting aspect. When you sign up to this app you receive a free "150 Coins" which you use to bet on Esports Matches covering: Counter-Strike: Global Offensive, League of Legends, Dota 2, Call of Duty and "Other" (also real sports matches such as the "EURO 2016"). This site also allows you to trade in Steam Items for more coins and from there you can gamble them, gain more and withdraw better cosmetics or you can also buy Steam Vouchers.

Spicing the Application up a bit they have added in a Lucky Dice game where there is "9999" potential rolls on the dice, if you roll "<5000" you gain x1.95 what you bet. You can really try your luck and decrease your potential of winning for a bigger payout but everyone can look into that if they'd like to. Another Mini-game they have is slots where prizes range from 1 Coin to 50,000 coins with a chance of the Jackpot scaling from x1 to x100.

All that I ask is if you guys choose to sign-up and check this app out, please use my referral code to help me out a bit, I really do appreciate it. Share it around with your gaming friends, get them on board and hopefully this app will take off! ?
