Thread: [Help me find this dupe glitch before Minecrafters server release](#)

Motiv - June 21, 2016, 7:27 pm

There's a dupe glitch going around atm that involves player vaults I BELIEVE.

Minecrafters have a faction server coming out soon, and I need to know the glitch to be able to fix it. I'm going to have PV's as a perk for some ranks, and want to be safe.

Please do not post the glitch here if you know it so it doesn't spread, and PM me.

If you do not have any warning points, and can help me out, you will receive an invite to the Minecrafters group.

I own a mid-sized server.

Pm me with information if you have it, I would really appreciate it.

it isn't special

Get enderpearls. throw enderpearl, before land do /pv 1. When landed take out items u wanna dupe. Then close the /pv 1 and reopen it. the duped items are there
