Thread: [Anybody interested in this gift cards?](#)

BATGOD - June 22, 2016, 3:48 am

I am a windows phone developer and I can redeem my points for some gifts card and I will like to sell it at a discount here. I can buy the following so I just need to ask how much will I get from you or someone for the respective gift cards in btc? I am just asking for advice and not exactly selling right now so if a gift card has high demand I will consider buying it using my points and then selling it here at a discount. I can buy multiple of them as well if somebody needs a higher amount as such.

- 15 USD windows store gift card
- 25/10 USD skype gift card
- 25 USD XBOX gift card
- 3 months XBOX live gold membership
- XBOX Music one month pass
- 25 USD Starbucks
- 25 USD Makershed gift card
- 25 USD Gamestop gift card
- 20 USD Newegg gift card

The reason I will want to sell them is that I personally cannot use them myself and I can obviously prove that I obtained it legitimately as such too.

Some advice will really be appreciated :)

Stashy - June 22, 2016, 3:50 am

I'd say the Newegg card would be pretty decent if you could get enough of them to buy something good. I think the only other good one would be Gamestop, but I don't personally play console games.

BATGOD - June 22, 2016, 3:54 am

Well thanks for the reply mate! As I said I cannot use it for myself for the main reason I am from not from the USA and yes I can definitely buy in bulk if anyone needs it and give a discount accordingly. I am just keen on knowing the gift cards which can get me the highest value :)

Ah, well, if you can buy in bulk, then I'd definitely say go for Newegg and Gamestop, but more importantly Newegg. Would be nice if you could sell like 25 Newegg cards to people as packs at a discount, because that's pretty much the equivalent of a decent graphics card if the giftcards are valued at \$20 a piece.

I might be interested depending on rates and if you can prove that this is legit.

BATGOD - June 22, 2016, 4:01 am

Hmmm thanks for your valuable feedback I will then surely look into buying Newegg gift cards in bulk, I am also thinking or asking for advice whether people will be interested in paying money in charity. Like if they pay 1\$ btc I will give to charity 2\$ that is double do 5\$ will make me give 10\$ in charity to organisations like CRY as such with proves ofcourse that I donated as that option is also available for me to redeem the points.

(Jun 22, 2016 03:58 AM)?yden Wrote: [\[CITE\]](#) I might be interested depending on rates and if you can prove that this is legit.

Ofcourse I will prove to you through photographs or even teamviewer or any method you feel is good as a prove as such.

For now I am not selling though I am just asking for advice about which gift card people will normally want to buy. And I can give a big discount as in any way I will not be using this gift cards myself but then I will not give away for free as hard work have went into making apps and collecting points.

So which gift cards will you be interested in buying mate from these?
