Thread: [Arya Stark's Downloading Instagram photos from requested page service | Limited |](#)

Goat - June 22, 2016, 9:21 am

I feel like I need to give something back to the community so that's why I offer this for free.

I've seen people selling this so I'll offer it for free a limited time.

I'll download photos/videos from Instagram pages, just name the page and I'll get them for you.

Regards,

Arya Stark from Winterfell.

Lol it's not that hard to do this. Just log into Insta on a PC, go to whoever's page has the photo/video and save the image or save the video with Ant and boom! Done.

As you can see I said "photos", currently I'm getting 710 photos/videos from an Instagram page for the user " AXis ".

I believe you meant 1 photo, I'm getting the whole page.

In Firefox you can save the page and it saves all the images and videos too so I hope you're not doing a harder method.

Nah I'm doing a easier method.

Some doesn't even know how to get them or some are lazy, I'm offering this for free.
