Free list of Proxy Server sites are very useful in many situations, whether you are in your college or you are in office you will be needing as compulsion. Without these Free Proxy Sites you wont access sites that are blocked (Facebook.com,youtube.com,hacking siteetc) by your ISP, college, govt or school. For this Free Proxy sites come into action and it works as life saver for you at that situations. Some website are not accessible in some particular regions(like youtube is not accessible in Pakistan) and blocked due to restrictions imposed by the ISPs. Restriction like Movie streaming site, Movie Download Sites, Free Mp3 Download Sites,Torrent sites. At that time only solutions comes in mind that is high anonymous proxy list. This is the only reason why people keep on searching.

ADVANTAGES OF USING A PROXY SERVER

#1 Anonymous browsing

One of the great benefits of using a proxy server is to hide internal clients from an external network. It makes your network id anonymous as the proxy servers will be at the forefront, protecting your network IP while allowing normal surfing. Since your internal IP network is not accessible from an external network, you are safe from attacks by unscrupulous hackers, scammers and spammer.

#2 Performance

Proxy servers may also cache Web pages and provide more efficient web content delivery. It can speed up the access to documents and site contents as it will always look in its local cache of previously downloaded results of all requests like pictures, and other static graphical content.

#3 Load Balancing

Proxy servers can also be used as load-balancer in a reverse direction for the workload among several content HTTP servers, each of them serving their own application area.

#4 Access websites filtered by ISP or institution

Occasionally, schools and institution will only allow access to certain website. When websites and contents are filtered by the ISP, you can bypass an ISP proxy by setting your browser to use 'another proxy server'.

#5 Filter Requests

Proxy servers can also be used to filter data or requests from external site.

Just setup mobile tor before hand if that's all you want out of it. I stack proxies and other things to remain anonymous in certain situations.
