Thread: [Will code simple program for free](#)

chocolatechipz - June 23, 2016, 3:14 pm

Hello. I can't think of something to simple to code so I'm taking requests.

If you need a simple program I can code it for you in Java.

Just give me a detailed explanation on what you need and I'll deliver a .jar file and the source code;

Palmr33fever - June 23, 2016, 6:30 pm

Password generator that has different buttons that you click depending on what type of password examples: a button that has mixed caps and non caps, numbers. and a way to set how long you want the passwords.

You can make a cool scientific calculator for me?

u01NGM - June 25, 2016, 7:13 am

Can you a small program with GUI that encrypts decrypts messages or passwords using these MD5,AES,DES,RSA,SHA1 etc?

DAGONCHU - June 25, 2016, 9:06 am

Can you make a simple Java RAT?

```
{
1. capture screen
2. keylogger/mouse control
3. system shell(user/admin)
4. upload/download file
5. encrypt target machine
6. others(camera control(laptop),bot net...)
}
```

If you want to make one like that,i'll glad to join :)

skozyy - August 29, 2016, 12:08 am

Will you help me to code a jar downloader that can download jar file and execute on windows. Will always be fud. Or jar crypter

y0da01 - September 1, 2016, 9:20 am

@skozyy i can help you with jar executor.. pm me

Dantelius - September 4, 2016, 8:33 am

Can you code a quick and simple program for me? I'll pm you the algorithm as long as you don't share it with others please :D

Monostable555 - September 4, 2016, 9:26 am

Could you code a simple program to derive any function?

Do you share the source code? Because I've just gotten started learning java and would love to see how it works!

Thanks OP for doing this!

CSpENZ412 - September 8, 2016, 8:26 am

I'm very interested in this please send a pm and we shall talk

ThugNasty14 - September 9, 2016, 7:49 am

Are you still taking requests on this ?
