Thread: [Users account is compromised UID: 1301122](#)

Koopa. - June 24, 2016, 11:12 am

I am 99% sure this user's account is compromised:

<https://hackforums.net/member.php?action=profile&uid=1301122>

His trust scan

I am sure that his account is compromised with all of the profile changes and security changes. I have a suspicion that the user in control of the account is <https://hackforums.net/member.php?action=profile&uid=97787> because he had a thread stating he had infected HF members and posted a picture from LL's password recovery their account information. This user then started posting in the RAT section out of no-where.

EDIT:

It could also be <https://hackforums.net/member.php?action=profile&uid=1927837> due to his same political opinions <https://hackforums.net/showthread.php?tid=5316449>

He put me on his ignore list after I pointed out that his Trust Scan looks shady as fuck.

So now you're threatening to scam members?

Because that's what I got from that post.

I feel this could be true as well, I was checking him out a bit myself yesterday. Add his UID to the title.

Thank you for the warning. Hopefully no one deals with him. Check his trust scan before dealing.

He got a neg rep from Omni so I think we'll find out soon.

Lor?d - June 25, 2016, 1:57 pm

Just randomly checked someone's rep and saw this.

This might be something.
