Thread: [\[HELP\] Secretly Monitor a PC](#)

WillyT1998 - June 24, 2016, 10:27 pm

I have a younger sister that is in the age of being sneaky and up to no good. She has a PC and I have a Mac and wondering is there a way to view what she is doing on my computer without her knowing? I figure like a RAT will work but I would need help setting one up. I can not Port Forward so if it involves that, then that option is out of the question. I am just looking for a quick and easy way to be undetective while monitoring her system. I am still new to this hacking stuff so something simple would help alot unless you give me step by step instructions.

Thank you all for your time and wisdom!

There's this tutorial for ratting without port forwarding

<https://hackforums.net/showthread.php?tid=929799&highlight=Portforward>

support the guy who made the thread by keeping it alive.

You have 2 main options

Install a RAT on the PC //OR// Monitor all traffic

More Info On RAT: [http : // hackforums . net / forumdisplay.php?fid=114](http://hackforums.net/forumdisplay.php?fid=114)

More Info On Traffic Monitor Programs: [http : // hackforums . net / showthread.php?tid=2391597](http://hackforums.net/showthread.php?tid=2391597)
