Thread: [LANC V2 | Yes i'm releasing the source for free](#)

Lor?d - June 25, 2016, 10:28 am

Here is my thread where I was giving away LANC V2.

<https://hackforums.net/showthread.php?tid=5259874>

I've decided that releasing the source would add the possibility that others would be able to add their own features, browse through it to increase their knowledge on the subject, or even just mess around with it. Also, I know i'm not the best coder so please hold back on any hate. It's not needed.

Might as well include a little screenshot for proof or something.

[img]<http://image.prntscr.com/image/3f573cf24ebd4646834495050fc1102c.png>[/img]

Let's get to the good part.

Here is the DL link for the archive: <https://www.mediafire.com/?bj8byix4yhsewuy>

I will not be including a virus scan because. Come on people it's a source. If you're that paranoid then don't even download it.

I would really love to hear any thoughts on this.

Hope you guys enjoy!

oop - June 25, 2016, 11:25 am

Looks good mate , nice that you released the source gives other users to learn the magic behind the scenes. +1 for giving back to the community.

Human - June 25, 2016, 11:26 am

Awesome, glad you did this. Thanks for the source

Lor?d - June 25, 2016, 11:27 am

Thanks for the positive feedback.

I love working on random little things. I originally wasn't going to release the source. But the way I look at it, if someone really wanted it they could decompile the executable. So why not just share it.
?

(Jun 25, 2016 11:26 AM)SoftWare? Wrote: [\[CITE\]](#) Awesome, glad you did this. Thanks for the source

No problem man. Hope you enjoy!

Lor?d - June 26, 2016, 3:21 pm

Bumping this. It's a great source and it has a lot of potential for anyone looking to add their own features to it. (at least I think so any way)

BahNahNah - June 26, 2016, 4:38 pm

Im confused on what this does. Can you gave an explanation?

Nick (Name) - June 26, 2016, 9:54 pm

You should upload the source on GitHub, it makes it easier to read without having to download anything. Thanks for the source release though..

Lor?d - June 26, 2016, 10:02 pm

(Jun 26, 2016 09:54 PM)Nick (Name) Wrote: [\[CITE\]](#) You should upload the source on GitHub, it makes it easier to read without having to download anything. Thanks for the source release though.. I don't have a github acc and I cba to make one.
It's not that much more work to download it and open it in VS.
Glad you're liking it though.

Josh? - June 27, 2016, 2:02 am

Is this basically Low Orbit Ion Cannon?

HFDone - June 27, 2016, 4:50 am

you put password didnt post it and no virus scan ? Legit

Lor?d - June 27, 2016, 8:12 am

(Jun 27, 2016 02:02 AM)Josh? Wrote: [\[CITE\]](#) Is this basically Low Orbit Ion Cannon?
No.

(Jun 27, 2016 04:50 AM)HFDone Wrote: [\[CITE\]](#) you put password didnt post it and no virus scan ?
Legit

Fully read the OP...

People like you are the reason I did this thread the way I did.

No problem. Glad you like it!

Twixles - June 29, 2016, 9:11 am

Just started learning C# so I won't personally have much use for this atm. However, I'm always a fan of source being released :)

Lor?d - June 29, 2016, 9:52 am

(Jun 29, 2016 09:11 AM)Twixles Wrote: [\[CITE\]](#) Just started learning C# so I won't personally have much use for this atm. However, I'm always a fan of source being released :)
Glad to hear it.

Honestly. Before I started working on this project I had absolutely no idea what most of it was. I have a much better understanding of a few things now though.

I'm hoping LANC v2 itself gets more popularity than the original LANC. Simply because it has more features to it.

I plan on adding a few more things to it and I will definitely update both the release and the source release when completed.

Oliver Sykes - June 30, 2016, 8:32 pm

I'm just curious as to how you manage to use VS for any amount of time with that theme applied to it, heh.

Well, I guess everyone has his/her own unique taste, huh?

Lor?d - June 30, 2016, 8:36 pm

I personally love the theme I have applied. But yeah. To each their own.

suitcasehorde - July 4, 2016, 12:40 am

Thanks you Man. I love Lanc v1 Also <3

Lor?d - July 4, 2016, 12:42 am

2344lkn - July 6, 2016, 8:32 am

Don't mean to be rude but I can't find a description on the original thread you linked or this one?

I can get an idea from the tabs but what exactly is this? Does it just ping 192.168.1.1-254 and show ping backs to display LAN Machines?

How does the database explorer work? Does it support both mysql and microsoft sql? Do you just type in a server/dbname/user/pwd?

I see ARP Spoofing! Which alone is worth it but any ARP Spoofer I've seen is from the same original source which does not work on an active domain or any routers/switches made after 2010 lol

I'm guessing by the overall look it looks like a mix of LAN Tools and Attacks

Lor?d - July 6, 2016, 9:49 am

It's essentially a packet sniffer.

The DB explorer loads up the tools own saved db. (right click > refresh db)

Geekie - July 6, 2016, 4:41 pm

Your going about this wrong. Let me guess once you start arp spoofing your console connection runs then you lagg off.

Lor?d - July 11, 2016, 12:05 am

Bumping this thread. Hopefully some more members can find this useful!

Looking forward to see if anyone releases their own version or shares screenshots!

Curious what sort of features you guys can come up with.

Darkingman1337 - July 18, 2016, 5:10 am

Thanks for this release, using the source to go over it and learn some more C# Thanks again :)

X GLOBAL X - July 20, 2016, 10:32 am

I vouch for him its legit did a virus scan its all good. Thank you so much for the source id love to add on to this or just have some fun with it!

Lor?d - July 20, 2016, 2:56 pm

Glad you guys are liking it. I hope you guys have fun with this source!

Effexion - July 20, 2016, 3:01 pm

COMPLETE newb to C#, but have been thinking about knuckling down and learning it (after research as to what language I needed). This will probably blow my mind, but will be interesting to cast a curious eye over. Thanks!

Lor?d - July 20, 2016, 3:27 pm

Good luck on your journey!

I personally learned VB first and learned with a lot of YouTube tuts and just fucking around on Visual Studio.

Everyone kept suggesting I switch to C#. I watched a view tuts, looked over the syntax a bit, and pretty much picked it up over night.

Although a lot of people call me a fast learner so that may just be me.

Anyhow, I hope you have fun along the way! That's the most important thing!

Formal - July 28, 2016, 1:16 am

This isnt working for me... <http://prntscr.com/byinf5>

Lor?d - July 28, 2016, 1:23 am

(Jul 28, 2016 01:16 AM)?Formal Wrote: [\[CITE\]](#) This isnt working for me... <http://prntscr.com/byinf5>

A lot of people reported the same issue with the original LANC.

I do believe it's something to do with either your .net framework, the c++ redistributable pack, or winpcap.

Formal - July 28, 2016, 1:32 am

um, can you link me some update .net framework and winpcapa possibly? idk what the other one is.

Lor?d - July 28, 2016, 1:34 am

thanks fam!

edit: already have these installed. IDk what the problem is :/

Ankeras - September 7, 2016, 4:31 pm

THx for the realese im learning C# , this will help me for sure !

nD_wuT - September 7, 2016, 4:34 pm

thanks for this man it's a great resource

Ninja - September 7, 2016, 4:44 pm

So what is this exactly?

You never explained anywhere.

Also, use OOP.

Lor?d - September 7, 2016, 4:51 pm

If you need an explanation on what this is you probably shouldn't even bother looking at the thread.

I'm learning about OOP actually

One of dem IP tools?

Geekie - September 7, 2016, 7:41 pm

Honestly, It's a spoof attack toward your own network. He put ARP in there and going all wrong about it. I mean his packets are even off one some of the tcp/udp header. But he never even answer my question from before.

YsBk Dervint - September 8, 2016, 2:36 pm

(Sep 7, 2016 07:41 PM)Geekie Wrote: [\[CITE\]](#) Honestly, It's a spoof attack toward your own network. He put ARP in there and going all wrong about it. I mean his packets are even off one some of the tcp/udp header. But he never even answer my question from before.
are you retarded?

Geekie - September 9, 2016, 6:31 pm

(Sep 8, 2016 02:36 PM)YsBk Dervint Wrote: [\[CITE\]](#) are you retarded?

How am I retarded? As I stated, the tcp header are off and so is the udp. If you also notice the way he has the arp spoofing coded. The network your capturing the packet for after running it for 30 secs begin to lag. So for you sir.

ARE YOU HOOKED ON PHONICS?

YsBk Dervint - September 9, 2016, 6:35 pm

the LANC source is 6 years old, it's not his code, he's just releasing it.

it won't make you lag either, ive been using it myself along with many of my friends and even resold it with unique features at one point, it works, it's not efficient, but it works.

Geekie - September 9, 2016, 6:39 pm

Yes it will LAG if you trying to capture udp connection. I release a lot of sources for ARP SPOOF(MAN IN THE MIDDLE). Attacks and packet sniffers.

YsBk Dervint - September 9, 2016, 6:41 pm

(Sep 9, 2016 06:39 PM)Geekie Wrote: [\[CITE\]](#) Yes it will LAG if you trying to capture udp connection. I release a lot of sources for ARP SPOOF(MAN IN THE MIDDLE). Attacks and packet sniffers. how does it lag?

like i said: the LANC source is 6 years old, it was literally DESIGNED so people could get the IP addresses of users on xbox live, it works fine as is.

Zenco - September 10, 2016, 6:04 am

thanks for releasing this :)

barotyson - January 27, 2017, 11:47 pm

what is the password of archivie rar?
