?XiS - June 25, 2016, 1:22 pm

Seeing as he apparently "isn't breaking any rules" with his threads, even though Beslim got closed for mass junking threads, but let me not get into that.

His latest (bullshit) sales thread:

<https://hackforums.net/showthread.php?tid=5315895>

What I have to say about it:

Now you got caught out you fuck.

Why did you remove the account from the OP.

To everyone reading this thread, this account was in the OP. Get Omniscient to fucking confirm it for all I care:

<https://www.bustabit.com/user/Bestbot>

Now look at it. It's in negative. Don't trust this fuck.

Let's shit on this fucking twat. I don't normally swear at and get aggressive with members on here, but this cunt already lost today, and he's still trying to scam members by selling them this shit.

Here's the first image, showing where he lost all the money.

Thank you. ?

It could have only been 1 failure. Take a look at the other accounts.

Well well well

OP you are a complete baffoon making this thread.

How the fuck am I scamming anyone this is gambling, it does state this on the sales thread and mistakes can be made.

This is 1 account out of 5 and now I have put it back in the OP of the thread with updates.

The script is only \$20 I said the price might go up but I need to get vouches in first like loads so the \$20 is well worth it.

How many more gambling bots are for sale on here... yes loads but you are not having a go at them.

What is it something that I have worded wrong in the thread I would really like to know?

Biker BoyZ - June 25, 2016, 1:58 pm

Well to be honest we all know scripts won't make you bank on autopilot ;P It might make you profit in the next hour but the rape train will make you lose in the end. The Script does work but 70% chance of raping you in the end.

Good thing about his script it has a "pause feature" , Its can't be that bad. its probs not meant to make you profit just to automate it for you.

He stated this:

Quote:Please read this first before buying

This is gambling so if you do play on the site bustabit.com this is for you, the method and script I have put together is perfect to help you win

You will not get a better script or method to win from the site as I have tried all kinds of scripts / methods and none have worked as good as this

Basically he saying his script is better than others, also said "help" not basically guaranteed to make profit.

I son't know what to say but theres alot of factors on this that he should not sell or sell. Most products like eBooks, Methods don't work anyways

These reasons are actually valid OP. I honestly think it was just a one account failure and as for scripts there are other scripts on the market that have fucked up too but no one made a big deal out of those. Finally, at the end of the day people selling these methods want to make money so they have to make the product seem like its flawless just like any other company or seller does. I see nothing wrong with this.

Or.... make a thread about every shitty product and fill the marketplace discussions with 10 threads every day. The only reason this shit seems "personal" is because everyone else is too scared to make a thread about him. Since I posted this thread, 5 people have PM'd me saying they agree with me. I don't suck up to anyone, I'm simply making the community aware that it's bullshit.

Anyways, if there is failure with one of the products in the market, then open a community alert. Have any community alerts ever been opened on me or any of my products? No. Because they work. If a product didn't work, I'd encourage the buyer to alert the community.

You keep junking all your threads, which is clearly against the rules, and should, in theory, get you RKd. Also, you have like 20 accounts in negative, but you refuse to show them in the OP. Gambling is a way to win money and by selling scripts you're basically selling nothing. Scripts aren't certain to win and there is no "winning" script. Black Shadow's script and every other one relies on some mathematical probability and whatnot but the truth is that it is all useless and sooner or later the account will crash depending on how far your luck can go.

Having said this, I believe that people that really buy "scripts" deserve a low quality product because they are already investing their money in an essentially flawed method. However, I do not agree with misleading members and continuously selling the Bustabit scripts.

Black Shadow's script and every other one relies on some mathematical probability and whatnot but the truth is that it is all useless and sooner or later the account will crash depending on how far your luck can go.

Having said this, I believe that people that really buy "scripts" deserve a low quality product because they are already investing their money in an essentially flawed method. However, I do not agree with misleading members and continuously selling the Bustabit scripts.

I find it pathetic that it has to go from simply reporting someone's shady business and faulty methods to personally attacking them. I'm all fine with people insulting one another on the internet, it's something very light and nobody takes it seriously, even shit like 'kys lol mongrel' isn't taken seriously, that's not it, when a group of users just gang up on someone, make it about harassing him for being stupid, that's when it goes savage. Well, not actually a typo per se, but:

'he doesn't want to seem to listen.'

This makes it seem like he doesn't want to look like he's listening. I think that in this scenario, you would have preferred to say that he doesn't SEEM like he wants to listen, which is something way more common to say, but, you could've been completely correct with what you've said, and I got the wrong meaning.

Alright, I respect that. Thanks for standing up to protect the community, although I don't approve of the means, the result is what matters, I suppose.

I don't understand why so many people are defending Black Shadow here. Over the last couple of months he's repeatedly lied to and deceived many members into buying his faulty products with no other reason than to support his crippling gambling addiction. There was actually a point where Black Shadow genuinely believed he had a way to 100% way to always beat Bustabit, and do you know what he said? He would NEVER sell it because he was making more than enough money on his own.

What happened next?

It failed!

What happened after it failed?

He released a "NEW AND IMPROVED NO LOSE SCRIPT" where he told his customers this if you followed it properly you would always beat bustabit. And guess what? He put a \$100 price tag on it!

Now for the members who have only recently heard of this, Black Shadow would junk his thread every time one of his PAYING customers would post on his thread with their bustabit account links failing time and time again.

Now if you think that was sketchy, he would then bully these members into not posting on his new threads because he would threaten to get their HF account closed if they did so for sales trashing. Does anyone else see this as a major problem?

This has now gone on for a few months and Black Shadow has made 25+ threads of the same thing! (Yes, Staff can 100% verify this if they take the time to) You know why there were so many new threads? Every single time it failed.

Now before anyone says I'm just trying to bash Black Shadow, you are completely wrong. This has gone on long enough and needs to end now, if this post saves even one member from getting scammed it's worth whatever punishment I may end up getting.

Actual betting wouldn't be a good test. You're limited by real time, and his pauses only prolong the games to reduce the risk of losing everything quickly. The only real test would be doing simulated bets through every single one of bustabit's games. Instead of a "24 hour test," with "pauses" that would make it more like a "12 hour test" you'll get over a year of data in a few seconds.

Looking at the bustabit account "Shadow4222," these seem to be the values

Starting at "n"

1.05 @ n

1.50 @ 2n

1.75 @ 4n

1.88 @ 8n

1.94 @ 16n

??? @ 32n. I'm guessing 1.97. Anyone know this value?

I'll consider a 32n loss as a "bust." Once I have that last value (and possibly the next), I'll test it

through all 1.8 million games.

You're basically releasing a project that's not even complete. Fix your script test it out for a week or two then if everything is perfect then release. Stop halfassing it releasing shit that's not even working properly.

That's the thing most of the community don't understand Gary. Black Shadow knows that his scripts don't work, he just needs the money to fund his gambling addiction. I'm glad everyone's finally learning the truth about this scum.

What happened after it failed?

He released a "NEW AND IMPROVED NO LOSE SCRIPT" where he told his customers this if you followed it properly you would always beat bustabit. And guess what? He put a \$100 price tag on it!

Now for the members who have only recently heard of this, Black Shadow would junk his thread every time one of his PAYING customers would post on his thread with their bustabit account links failing time and time again.

Now if you think that was sketchy, he would then bully these members into not posting on his new threads because he would threaten to get their HF account closed if they did so for sales trashing. Does anyone else see this as a major problem?

This has now gone of for a few months and Black Shadow has made 25+ threads of the same thing! (Yes, Staff can 100% verify this if they take the time to) You know why there were so many new threads? Every single time it failed.

People often confuse on HF that reputation points = reputation but that's not correct.

Reputation is based on what you have done to the community.

Example, an reputable member is famous for exchanging and have 500 reputation points. (No scam reports) But....

Another member which is not so "popular or reputable" have 1000 reputation points. (Scam reports included)

Most people on HF would decide to deal with person with 1000 reputation points because "he has higher"

Therefor, logic is Higher = Trustworthy which is not correct at all.

I hope people would realize this one day.

I am telling you now I will have the last laugh about this.

You can see 4 of my accounts are in the positive 2 are negative

So your all bitching over 2 accounts that are down and not even by that much

My winning accounts have more in them than the losing ones

So technically I am up on bustabit by over 1 BTC

Add them up if you dont believe me

Here is the list of my 6 accounts

USER: blackshadow

USER: Dex

USER: Omnisient

USER: BlackShadow_Test

USER: BlackShadow2

USER: CooldownBot

USER: BestBot

Without getting involved in any of this, I wonder why he is still trying to sell his script. He received a LOT of negative feedback for it. He should either learn to take negative feedback and keep going or just simply stop trying to sell it at all. Posting a new thread everyday and junking it after it gets 5 negative comments is not the way to go...

Don't get high off your own supply. You even try use your own script to earn money, and you fail.
