Thread: [\[I33T/Uber\] Free 1 month layer4/7 anti ddoss offshore hosting](#)

Bill Gates - June 26, 2016, 1:42 am

THIS IS FOR 1 TRUSTER UBER/LEET ONLY!

This is for trusted leet and uber members only, if you want to act like a skid with any service i provide, i'll drop kick you in an instant from my services.

What you will need prior to accepting this test package, is a domain to point at my nameservers. (which I'll provide the nameservers for) A brain and the ability to work cpanel

You'll have it set up and details passed onto you.

I have anti ddoss highly layer 4/7 on an offshore host. I'm offering 1 person a vouch copy for 1 month of testing. You must give an honest review to me personally of the product. (pm)

This is purely for whitehat purposes only.

NO SKIDISH illegal activity whatsoever.

If you can't accept that move on, if you can accept it but think you can pull a fast one then don't, i can monitor everything ;)

This is the package I'll be testing.

Cpanel
Disk 10gb
Bandwidth 250gb
FTP unlimited
mail 10
unlimited db
sub domains 10
parked domains 10
addon domains 10
99.9%uptime
Cloudfare
layer 4, layer 7, DDoss protection
Offshore location
White hat ONLY.
Robust hardware
1 click install aps
Free site builder

This test will remain for 1 month then you can either continue and pay me the small amount to host

or i will shut down your account with notification prior.

This isn't automated, so i will have to set you up, so bear that in mind. (I'm not permently attached to my computer)
