-Random curves.

-SlowAim.

Or if you're smart you know what could help to bypass it easy ;D
enjoy being faceit proof ?

n0tes - June 27, 2016, 9:56 am

You have no clue, honestly.

Now do you want to explain to me how pSilent works???

What do you mean?

Curve and overaim is prob the closest your aimbot will come to a human aim anyway.

(Jun 27, 2016 11:05 AM)n0tes Wrote: [\[CITE\]](#) Bezier curves don't look legit at all. Then you're not using them properly, you dont have to make a huge visible curve.

Also u dont need to use bezier curves, simple math works just fine.

You know ... I don't post much but all I see you doing is talking shit with out referencing proof for anything you're talking about. From what I gather you make all these accusations with no proof to support what you're talking about. Calling everyone dumb and how they could have done it better but yet put NO examples. Call everyone a paste master but yet you provide no code of your own to backup your bullshit. Definitely not a regular here but you sir are annoying af and an obvious multi. Your life is an ezmeme kid.

Simply doing the mousedx/y bullshit someone posted on UC won't magically make you undetected if that's what you think

arek777 - June 28, 2016, 6:01 am

You people talk like bypassing faceit is a big thing. ?

NoOneCaresMate - June 28, 2016, 6:09 am

dude just do this

```
cmd->Viewangles.z = 1337.7331f;
```

ez bypass all anticheats
