Thread: [Notorious• uid=2837356 itsvoxi sirvoxi Malicious Activity](#)

Gaius Julius Caesar - June 28, 2016, 4:51 am

Notorious/ Voxi: <https://hackforums.net/member.php?action=profile&uid=2837356>

Skype names: itsvoxi, sirvoxi,

Participates in highly illegal activity and attacks community members. He hacked my Amazon account without provocation at all just to start something. His old skype was itsvoxi, I reported him to microsoft and he has since been banned.

Proof: <https://imgur.com/a/ScxVS>

One picture if of the skype conversation, the other is of the link Voxi sent in the skype chat.

Voxi has been attacking community members for a long time but this time he barked up my tree. He has made many threats in the past just to start fights. He is a self proclaimed god hacker, but just started learning about 2 months ago. I am warning the community about affiliation with this person and to avoid him Entirely. He has been reported to his local authorities for his actions and will be under investigation as well. I wish anyone around him luck.

Voxi - June 28, 2016, 5:38 am

Hardly, you was threatening 13-16 year olds on Skype, I told you multiply times to leave them alone. Also, I never said I hacked your amazon, somebody else sent me those. Don't threaten 13 year olds...

In almost all community reports, why doesn't the defendant take the report and try harder fix there ways . Then contact the user who made the thread and ask for it to be removed. Instead of just blaming the other person it's ignorant and immature.

Then contact the user who made the thread and ask for it to be removed. Instead of just blaming the other person it's ignorant and immature. Because he's already reported me apparently, got my Skype banned and we're in PMs now and it's not going anywhere.

I don't care for this but In honestly, I feel this shouldn't be anything to do with Hackforums. Just because the person is a User it doesn't mean that Hackforums should have anything to do with it. It's like someone stabbing you and you reporting it to Youtube because they are a user (*Not a great way to describe it but still*).

Youtube because they are a user (*Not a great way to describe it but still*).

A large portion of HF is supposed to be about community at least it used to be... I believe that users should never attack other users of that same community. Also, reporting to youtube would be null in comparison to this. This is an alert that he is under investigation IRL which is quite pertinent to this forum where others might be doing shady shit with him. It at least gives them a chance to see his true character and that he is now a large risk for them.

It at least gives them a chance to see his true character and that he is now a large risk for them. A Large risk? I'm pretty sure what I do is hardly anything compared to what others do. I never hacked the Amazon. The police will likely laugh.

The local authorities did not laugh, and talked quite in depth about how I can press charges if I want to, and that I could also pursue this in Civil court AS WELL as pressing criminal charges. I have not pressed charges yet.

Lol, all he does is get on LeakedSource.

I never understand why people get freaked out of these "Online public information lookups"

The information obtained on leaksource could not be applied to my Amazon account or any other account as I reference it to ensure anything that is leaked is changed immediately. The issue is not the looking up however, it was that he attacked unprovoked under the context of trying to start a hacker war. Review the logs before posting opinions plox.

He still just uses leaked info from databases.

That's besides the point though, him looking through DB's and logging into your stuff is pretty no life like.
