Hello HF graphics wizards.

I have this image that I made in paint that I want to put in my book:

<http://image.prntscr.com/image/e50b51d0b2ab43c9840d182cf90529e5.png>

If someone could make a more professional looking render of it that I could put in my book that would be great. Ideally more readable text, same colors.

After 24 hours i'll paypal \$2 to the best one ?

Here's a simple gradient one.

You were not specific on size / resolution neither were you specific if you wanted the borders gradient or no gradient and just the text or whatever so here ya go

Size and resolution should be the same as the one I posted. It actually can't be in color because it's going into a black and white print book so it needs to actually have the names spelled out.

If you end up picking mine :) good luck with the book man.

EDIT: It's transparent, it has the "connections" designed, just get the image url and paste it to

browser to see with a white background.

EDIT2: Also the one above has wrong labels as comparing to your image, dunno if it matters
