OFFICE EXPLOIT BUILDER WORKS WITH ALL EXE & JAR FILES!

Completely undetected..

https://spyralscanner.net/result.php?id=SSVSznoAxY

Bypass Gmail..

Full feature list..
Office Exploit - Word AND Excel - Office Exploit Builder allows you to create a DOC or XLS exploit with MULTIPLE files hidden inside!

Easiest Spreading Method - Not getting the results you want while spreading? Office Exploit Builder makes spreading extremely simple.

Unique Stub Generator (USG) - Every build is upto 90% unique to ensure the longest FUD results.

Encrypted Links - Every link is encrypted to keep your files and information safe.

Both EXE & JAR files supported - No need to worry about what type of file you're using, because Office Exploit Builder supports it!

Add Text On Enable - When your target hits enable content, text will be added to the document to make things less suspicious.

Fake Message - Creates a fake error message when the document is opened.

Password Encrypt Doc/Xls After File Is Executed - Stops studying of exploit code if client notices anything suspicious.

TINY Stub - ONLY 34kb.

Unlimited Builds - Create unlimited BINs!

Tutorials - Professional step by step written and video tutorials available inside the builder.

Silent Add-On - Maybe your target doesn't trust macros? With the silent add-on they won't need to hit 'Enable Content'!

Built-In Crypter - Encrypt your files before using Office Exploit Builder with the built-in crypter to ensure the best results possible. Crypter stub is coded in AutoIT and requires NO DEPENDENCIES!

Automatic Updates - Update your build with the click of a button, they're also FREE!

Template Tab - Free social engineering document templates to maximise your infection rate!

UAC BYPASS - The only Office Exploit around with a fully working UAC bypass!

FUD - Fully undetectable by all anti-virus'.

Terms of service..

WHEN A PURCHASE IS MADE, YOU ARE AGREEING TO ALL OF THE BELOW..

By purchasing you are acknowledging that you have read and accept the contents of our Terms of Service.
All customers must receive full legal advice on our Terms of Service before purchasing, relating to their location of purchase.
You are accepting that Office Exploit Builder is to be used as strictly educational use only.
Any persons to use Office Exploit Builder for any malicious purposes accept full responsibility for any case/penalties/punishments held against them by any government/authority.
Neither I, nor any of our partners/employees will accept ANY responsibility if any case is made against you because of your misuse.

1. You do not have the right to distribute/leak this product, or any source/bins.
Under no circumstances may any person attempt to distribute/leak Office Exploit Builder.
Any customer found to be doing so will be instantly banned with no chance of any type of refund.

2. You do not have the right to resell product/bins.
Once purchased, you may not sell or transfer your license to another person.
Your builder will be locked to one PC, if you would like to chance computers, please contact us.

3. All sales are final - NO REFUNDS.
Office Exploit Builder is sold as seen, all sales are final.
Customers will only be applicable to a refund under very specific terms, such as accidental double payment.

4. The product may not be 100% FUD at all times (Max of 1-3 detections); I am constantly updating to remain FUD, but updates take time.
We try our best to remain 100% FUD builds, updates come frequently so please do not contact us about detections
Some customers think it's acceptable to abuse Office Exploit Builder and cause detections (Your license will be terminated if found to be abusing).

5. Flaming/rude behaviour on the thread/support will NOT be tolerated and you will risk your licence if you proceed (If you have a problem please PM or email me).
We do not appreciate flaming or customers showing rude behaviour on our threads or to our support.
If your behaviour carries on after being warned, your license will be terminated.

6. Customers may not use this product for malicious purposes, anyone being found breaking this rule will be banned.
Office Exploit Builder is to be used as strictly educational use only.
Any persons to use Office Exploit Builder for any malicious purposes accept full responsibility for any case/penalities/punishments held against them by any government/authority.

7. DO NOT SCAN USING DISTRIBUTING SITES SUCH AS VIRUSTOTAL, NOVIRUSTHANKS, JOTTI, etc.
No customers may scan on any of the sites listed above.
If you are caught scanning anywhere other than the recommended sites (scan.majyx.net), your license will be terminated.

8. DO NOT UPLOAD EXPLOIT TO DISTRIBUTING SITES SUCH AS MEDIAFIRE, MEGA, DROPBOX.
No customers may upload on any of the sites listed above.
If you are caught uploading your builds anywhere other than the recommended sites, your license will be terminated.

9. NO MASS MAILING.
We do not allow mass mailing.
It causes huge jumps in detections and ruins it for other customers.

Mon3y is a swell guy when it comes to coding he knows what he is doing he makes the top notch exploits on HF. I remember one time we were sent overseas to fight during the regime in Kabul. It was just me and Mone3y in the open battle field while the enemy's were shooting AT'4s at us. We

were surrounded no where to go our team had abandoned us. Then out of the blue Mon3y came up with the perfect solution. He told me "Online Grab your laptop I got an idea" So I did he coded a doc exploit in vba in just those 5 minutes and made a SE temple. He told them to open it and click enable content and they were infected with poison they only had 5 minutes to live.

the end.

I think you are just playing on my intelligence. I have been patient with you on this issue. I paid for a private builder. I can not use it because It is never FUD and you promise to make it FUD. Its being close to 3 weeks since you deliver the product, from the moment you gave me the builder, it was never FUD and till now not FUD.

I have given you enough time to make it FUD, for 3 weeks you failed. Its high time I demand for refund.

For all my loyal customers, you'll have a new update by tomorrow. :)
Hope you all have a great day.

And this time i'm not taking it down, don't even message me asking me to remove the comment again. It's time everyone knows the truth.

==========

Just a warning to everyone, he promotes this as FUD which is complete bullshit! Not even close, most of the time between 5-8 detections from Major Anti-Virus companies. Useless.

I bought this months ago and still have not been able to use it after requesting support several times with 0 help.

In his own ToS he states:
4. The product may not be 100% FUD at all times (Max of 1-3 detections), I am constantly updating to remain FUD, but updates take time.

I personally have never seen it below 5 detections. I have written him in skype, HF PM and his Support Website with no help whatsoever.

He will reply saying that you should use HQ images in the document or a different direct link and blah blah blah, but never gives real support and never fixes the real problems.

So in your own ToS you have these:

4. The product may not be 100% FUD at all times (Max of 1-3 detections), I am constantly updating to remain FUD, but updates take time.

5. Flaming on the thread will NOT be tolerated and you will risk your licence if you proceed to after being warned (If you have a problem please PM or email me)

YOU BROKE YOUR OWN ToS FIRST SO WHEN I POST ON YOUR SALES THREAD THE TRUTH BAN MY LICENSE IF YOU WANT BECAUSE IT DOESN'T MATTER, YOUR PRODUCT IS SHIT AND DOESN'T WORK ANYWAYS.

(Jul 21, 2016 09:27 AM)Mon£y Wrote: *[CITE]* @kent0o - I do not want people like him or you as a customer, no. This project takes the majority of my time up, and I am not going to stand for people lying on my thread trying to make me and my product look bad.

I asked him to submit a support ticket several times and I'd come help him, he totally ignored me.. Never even replied to my message, then he has the cheek to come on my thread and say I have no support? I will NOT tolerate this childish behaviour. How am I supposed to help people, that don't

want help?

I'm trying to grab whatever I can and disappear? You chat out of your arse mate, I've been here since 2009 and have no plans on going anywhere soon.

Oh and by loyal customers, I mean people that have followed my simple rules (Unlike you and tissuehalf), some of them have been around since product launch over a year ago and they are still pleased with my product to this day.

People like you give me a bad name, you purchase something without reading the ToS, break my simple rules and then have the cheek to flame my thread with a load of bullshit.
How the hell do you know the detection rate anyway? You've been banned since V4. You have too much free time mate, go find a job or something.

[b]I find it hilarious that the only people that complain about my product, is people that break the ToS. ?
""If anyone is interested in Office Exploit Builder, but you're skeptical because of these two idiots; PM me and I'll send you a fresh scan and show my product works perfectly over TeamViewer.""[/b]

Warning to all unsuspecting buyer... Simply ask this fraud to scan the macro enabled .doc (already exploited document). Don't be fooled by his false claims. I guarantee you a 5-8 detections.

He keeps saying we break his TOS but could not explain or prove it. If breaking your TOS means exposing your fraudulent claims, then I accept it.

Mon£y - *July 21, 2016, 5:27 pm*
Seriously you guys, how childish do you want to be?

@pdapentester - Why have you not emailed me or spoke to me about this? I'm here to help mate..

@tissuehalf - You'll flame on the thread but won't message me back? I've sent you multiple messages now, told you create a support ticket and you've ignored me every time. How am I supposed to help you if you won't accept my help?

@kent0o - You orginally broke the ToS by scanning on sites that were not allowed, I re-enabled your license because you seemed like a nice guy.. You disappeared for a while then came back and started flaming the crap out of my thread. I will not tolerate childish behavour like that, if you want to talk to me; email me.

I am not a scammer and never will be. I have many customers and they're all happy, I put so much time and effort into this project and I will not have you guys destroy what I started, it's not fair.

As for all my customers that abide by the rules; I'm almost finished with the new update.

Updates are coming soon so keep an eye open mate.If they are real scans, then please show/tell me how to achieve those results....here are my settings:

- I am using a private 0/35 stub that currently bypasses all AV's
- Yes I know what a direct link is and mine works.
- HQ Images in document
- Every possible combination of settings on Office Exploit Builder

No matter what I do 5-8 detections.....so in your ToS you state 1-3 detections, last time I checked 5-8 is not between 1-3.....someone correct me if I am wrong on the math here.

Essence - *July 24, 2016, 2:50 pm*

Why not update the pictures provided in the thread. About 95% of the people that have bought this are commenting here saying they get a lot more detection's then 1-3. I'd like some actual proof before buying, real-time FUD tests, pictures, etc.

Mon£y - *July 25, 2016, 5:48 am*

Please be patient guys, the update is very, very close.

I've been working very hard on this one to make sure it's absolutely perfect, hence why it's taken a little more time than usual. :)
Here's what this update will contain:
- New download method: The current one sometimes throws an error, so I decided to completely re-work how files are downloaded.

- A few bug fixes: People were talking about how the crypter sometimes glitches out and doesn't let you select a file, that will be fixed.
- Remove selected/all links from file list: Totally forgot to add this to the previous update, if you make a mistake you'll be able to remove that link instead of closing and re-opening the builder.
- FUD: Obviously.

Is there anything else you guys would like to see added to the new update? Please let me know!

So right off the bat I am kind of disappointed that i need to wait for OP to set up my account and email me before I can even use this product.. $90 and would have hoped this would have been a more efficient process but i'll be patient and see how this goes.. Will update with a review on this product.

UPDATE;
Due to product being cracked in previous version, manual activation is completely understood and fully appreciate the security in this. OP is VERY efficient with account and product setup after purchase. Thanks

Update is here!
What came in this update?
- ReFUD of main code, silent add-on & crypter.
- New feature: Password encrypt DOC/XLS once file is executed. (Stops studying of exploit code if client notices anything suspicious.)

Its a Scam dont fall for it the macro it makes never fud , never was and never will be OP will steal your money and no support , he will tell all kind of lies before sale , all screenshots links from virus-checkmate are lies.... dont get fool from file size the macro builder make they are shit the functions used by macros are not fud example

Private Declare Function hotll Lib "URLMON" Alias "URLDownloadToFileA"
and
#If bxhxj Then
Private Declare PtrSafe Function hotll Lib "URLMON" Alias "URLDownloadToFileA"

OP is bloody scammer... just read his old thread pages and you will see

@Fibao - First of all, he never bought Office Exploit Builder, he bought DownSploit.
Second.. The obfusction causes false detections.
Third, you're 'friend' or should I say YOU are a multi accounter. I'm reporting you to a member of staff.

I have sent you 12 emails. u went silent after i explained in full that its not working. Who knows maybe you will delete this my comment. i paid you 90 dollars and up till now nothing is working. You refused to answer my mails for the past 3 days but you just commented here yesterday.

Thats my sweat, my hard earned money. Answer me to know what is going on or refund.Brother same is the case with me.
I paid for the Professional Package, and it's been 10 days, till now it haven't worked. I tried to be calm and patient. Everytime i sent him message to help me out, he would PM me that he would BAN my license. This is a CLEAR Fraud. I posted against him on this thread and he threatened me that my license would be banned, and asked me to delete the posts. I asked him to fix the issue, and deleted the posts against him, thinking he would help me out. All he said is update the package and get MS-Word 2010. Nothing is working.
Even if he bans, our money is gone, it ain't working anyhow.
I wonder why SCAMS like this are in the market.
If anyone needs the proof that i am talking to this guy from last 10 days and it ain't working, PM me, or if you want to know what kind of abusive PMs and Emails you would get after you pay, PM me.
I would ask for a refund from him, which i think he won't, cuz he's selling JUNK and just wants BTC and then you can go Fuck Yourself !

My PC has finally been fixed guys. :) Version 6 of Office Exploit Builder should be finished and released tonight!

PLEASE ignore the users flaming on the thread. Only one of them was an actual customer.
He broke the ToS and got his license suspended, now he's using multiple accounts and getting his friends to flame the thread.
I've never scammed anyone, nor do I ever plan too.

If you were looking into purchasing Office Exploit Builder and this idiot has made you question it, feel free to ask any of my hundreds of customers that actually follow my simple rules. ?

Its been 3 days since I received a reply on your support ticket #483

rafadon - *November 1, 2016, 11:12 am*
Mon3y, u are just an idiot for calling Gani a scammer. You took Gani's 120$, took my 90$, took Glaco 70$ and u ban license of everyone. U sold a dead builder yet you are lying to your fellow mates here. U are just how u were born - a father of all liars. u took our hard earned cash and put it in your pocket then use your useless TOS as excuse.

May u not last long.

if you buy this builder, you buy at your own risk. it is dead . caput.

OnlyLee - *November 1, 2016, 6:41 pm*
i know you have some angry customers here but well, it would be great if you can show me an demo file , my skype duy.l.k
thanks

rafadon - *November 2, 2016, 5:55 am*
@onlyLee, we are not angry - we need our money back, our hard earned money from our sweat and this little bastard took all from us. He told me it works like a charm. He told 12 others the same, he took our money and banned license. then he gives -3 so u cant come and complain here. th next thing he finds ways to shut down your account with help from HF admin. Mon3y is a real james bond and out to scam all of us. read newest buyer who are just beginning to realize that no working builder here.

Mon3y work is to wait for prey like you, take your money then ban your license by saying u disobeyed his TOS when you complain. Now TOS is his tool to defraud us and HF admin aint doing shitz about it.

Sorry for the delay in replies guys, I've been really sick. :(
Just starting to feel better now - I've replied to everyone! Update will be here very soon, once again - very sorry.

The guy sales trashing (rafadon) is not an Office Exploit Builder customer. He is a friend of a scammer Ganie who broke the ToS and is trying to sabotage my sales. Please ignore him.

@rafadon - You and Glayco have never even used Office Exploit Builder, never mind purchased it. You're a friend of Ganie, who is a dirty scamming piece of shit. He broke my ToS countless times and now is threatening to DOX me. Leave me the hell alone, it's not my fault your friend is too fucking retarded to follow simple rules.

Who are you going to trust: rafadon - who made his account this month and has matching IPs to other members (Multi-accounter), or me.. A member of HF for almost 7 years with nearly 800 positive rep.. You decide.

The majority of people claiming I'm a scammer have never even spoke to me before, never mind bought my product. They are all multi-accounters or friends of Ganie; a scamming piece of shit that broke nearly every one of my rules. I'm not just going to let him break the rules and ruin it for all of my other customers, am I?

Use your heads guys.

VERSION 6 IS FINALLY HERE!

I'd like to apologise for the long delay in releasing, a family member fell very sick and I had to look after them so had no time to work.

Anyway, it's here now.. Here's a screenshot and a list of what came with the update:

ReFUD of all codes,

New GUI,

Tutorial tab added,

New video written and video tutorials,

Updates are now totally automatic, no more pressing a button,

Improved encryption,

Improved USG,

Added UAC Bypass,

Added multiple download methods,

Fixed bug where file(s) weren't running correctly,

Few other minor bug fixes,

Help tab added - with FAQ's,

& much more.

Enjoy it guys, and please HAVE SOME CONSIDERATION FOR OTHER USERS.

There's a lot of other Office Exploit products popping up around HF recently, all I can say is DO NOT TRUST THEM.
They are ALL re-sellers of a previous seller here, who scammed everyone and ran away with their money.

Now he's getting multiple members to re-sell his product so he can scam everyone again. Just be careful.

@Glyco - You do realise that the link you just posted is a re-seller of ExploTools don't you? You know the guy that you made a community alert on for scamming? Yeah; don't you feel like an idiot now. ? Stop posting scams on my thread.I have asked your repeatedly for proof and you don't even reply to my answer. Folks you have pretty much seen this do not spend this excessive money on a shitty exploit. In fact you can learn the time to make it in less than 2 days its basic vba nothing all hell you can even make it in Metasploit. If you're cheap and need the builder its 25$ here

If you bought his product - you'll see for yourself in a month or two. :)
My builder has almost been running for 2 years now and there's been 6 versions.
Please stop advertising a scam and my thread and go mind your own business.All you're doing is pointing out useless accusations. First you said I wasn't a customer now you're saying I was a customer but I got banned. Make up your mind!

Folks I highly advocate you steer away from this builder its a waste of money and you can find the code online publicly. This is an overpriced piece of crap..

Grow up and leave me alone.
My builder is on another level to his, hence the price difference. You get what you pay for.
A lot of his customers have come to me after they used his.. Says it all really.

Please stop replying; you're breaking multiple rules and I will be reporting you. :)

Is any one receiving their registration code after purchase? The OP isn't responding to my PM's, neither email at support. WTF is wrong? the owner is offline since 15+ days.. is this how this service works? Man I regret buying this :| My money is stuck

eHate - *February 4, 2017, 3:43 am*
After thorough examination it's a decent piece of software, not worth near the price I feel. It's not FUD and hasn't been since I purchased it, however OP says he was releasing a FUD update the night he told me that but this was a couple of days ago now. I've only heard from OP one time which was after I had sent him an e-mail, and support ticket with which he explained he has been busy with resolving someone trying to destroy his product. Still, I feel I've been had on this purchase and would have to say it's not as good as some of the others out there. I very much like ASVPS's silent builder as well. But these are just my opinions and in no way are defacing towards this product or its value, and with that should have no precedence over your decision to purchase or not purchase OE Builder.

Mon£y - *February 6, 2017, 8:28 am*
I am very sorry guys, I have had a lot going on outside of HF, and family always come first.
Anyway; I am back for good now and I've already released a temp update, should be FUD.
I am also working on a bigger update, changing a few things, re-writing code and maybe adding even more great features. :)

bro where is the update? whats the point of this software when its detected

Zweisicht - *March 5, 2017, 10:55 am*

I am interested in buying the professional package of this exploit but i need few clarifications, with this silent add on feature, does one have to click on enable content before it will execute and also can it come in .doc or .xls format if exploited to silent ?

teedteed - *March 7, 2017, 1:30 pm*

Hello,
I have paid Builder and i have sent email to you and no reply nothing up to now.
What happening!

Mon£y - *March 8, 2017, 3:16 pm*

Update will be updated as soon as my domain is transferred, you can still purchase the builder & it will work flawlessly. :)
P.S - Never buy a domain from GoDaddy - They are terrible.

Doesn't matter. You ignored me for a week straight I had all right to get mad.

You already agreed to refund, You can't go back on that this scam dispute is still not solved, You cannot ignore it.

You have scammed me $4 it's real pathetic that you ignore the situation, You stated the programme worked 'Flawlessly' Which was a big lie, It didn't work at all? Can you not see you are wrong here?

I'll keep posting the scam dispute here until you resolve this. You can neg rep me all you like to stop me from posting that just makes you look even more suspicious.

I have spent all day finding and removing possible ToS breakers, this is to ensure everyone has fair use of Office Exploit Builder without some idiot scanning on sites that distribute.
FUD times should last a lot longer now, updates will also be coming a lot more often, as you guys asked. ?
If you cannot access the builder (I may have removed you by mistake), please email me with payment proof and what you have been using the builder for and I'll sort it out for you. :)

Another update will be coming in the next few hours, your builder will warn you of an update.

That is completely understandable, an email response would of been appreciated. I encrypted my OS and fucked it right up like a noob and hence lost all my tools, and my keepass database containing my randomly generated passwords for my HF account and my proton mail. Thanks mate, hope you enjoy. ?

Hi - you email me (From another address) saying you lost your HF account AND email address and don't even send me payment proof, how do you expect me to believe that?
At least send some proof.

Hope you do, I'm sure you'll enjoy it!

I would recommend purchasing the Professional version of Office Exploit Builder, as it comes with an FUD crypter.
I don't understand...if the exploit is FUD why do I need a crypter?

Mon£y - *April 18, 2017, 12:34 pm*
Update is LIVE!Re-FUD of exploit & silent add-on,

A few changes to how the exploit works to help bypass emails with more success,

A few minor bug fixes,

New encryption module,

Currently also updating the crypter and website. :)

Still the best Office Exploit Builder to-date! Don't fall into buying a crappy tool from a re-seller.

Is that you will not join your server with any file. Your server is uploaded to the cloud and the resulting .doc of the builder acts as a downloader

i am really enjoying your product still the best in hf send you a pm still waiting for your reply

robwilliams464 - *May 8, 2017, 5:13 am*
I bought the 120 dollar version. My review of this product:

Cons:
1) The crypter is useless. You can NEVER get anything better than 11/35. FUD is light years away.
2) The Builder has higher chances of crashing at startup than running.
3) If you are lucky to get it to start up, the exploit code that will be created will almost always crash. Like 90% of the times. Word will always give you crash results when running the macro.
4) At times the .doc marco will run and download the payload. BUT, every antivirus will detect the .doc file as a virus, due to the pathetic encryption of the macro code.

Pros:
1) good response rate from the seller in terms of assistance. But support can't do much when the product is s**t.
2)None

Money, please go ahead and ban my license. Give me negative reps if you wish. Congratulations for ripping me of my hard earned $120. I work two part time jobs and takes 2 weeks to save that amount of cash. Congratulations!!! You are a genius conman. So proud of you. Hope you sleep well after robbing so many people of their hard earned money.

@robwilliams464 - Already told you crypter is in the process of getting totally re-written, wrote it on the thread too.
Builder or exploit has never crashed for me or any other customer, try changing where you're hosting your file.
DOC is FUD so that's false.

This is not a support thread, and you're extremely rude and most of your comment is bullshit.
I'm clearly trying to help you but you're obviously just a stubborn asshole that spits his dummy out when one thing goes wrong.

youa know a product is good if it sticks around like this and sales still going strong. I would buy this, this very secondif it supported pdf exploit. Any chance of that in the works? I'm considering tryijng to make it work with a doc exploit, but It sounds like you can only add txt to the doc and not pictures...which to have. THat said I obviously need an exploit that goes further than an error msg and displays what you claim. Im trying to find a use for this in some of my business just because its seems so nicely done. good work, says an impulsive buyer.

there are 2 types of sellers,
1. The type of seller wich adminit his mistackes, and try to solve them.
2. the type of seller who take the cash, and dont give a fuck.

Gues wich type of seller (money) belongs to??

stop lying the members, there are tons of threads opened about your useless OExploit, wich worked once, and now its just a piec of shieeetttt.

I will keep posting and PMing members, till I get a good product for my money, or I will notify every member wich posts in your sellers thread.

PS.
Its not about the Earnings, its about a statisfied Costumer.

Does this exploit builder work with latest office verisons like 2016? and with silent addon on it?

without macros?

Mon£y - *May 25, 2017, 10:42 am*

I have been told people have been abusing my service and using Office Exploit Builder for purposes which are against my ToS.
I have had to do a complete database prune, any current customers will have to email me with your HF UID, serial, payment proof & what you're using the product for.
The builder is currently offline due to me migrating to a new, faster server. It should be back up later tonight or tomorrow - along with a big new update.

SALES ARE STILL ONLINE - New customers can still purchase and receive their product but won't be able to access it until the server migration is complete.
I am closing the thread until the work is finished.
I hope everyone has a good weekend. ?

Just letting you guys know I have not disappeared, I have been very busy working.
Office Exploit Builder is currently processing a huge update, version 6.2.0.0. There's plenty of things to look forward to. :)

Here's a list of what's happening: New, faster servers for the website & builder. - The website and builder will run a lot faster and smoother.

Complete re-code of DOC/XLS stub. - DOC/XLS exploit codes are being written again from scratch, higher & longer FUD rates.

Complete re-code of silent add-on stub. - Silent add-on code is being written again from scratch, higher & longer FUD rates.

Complete re-code of crypter stub. - Crypter stub is being written again from scratch, higher & longer FUD rates.

Improved features - I'm also rewriting the exploit, builder and crypter features to ensure they are working flawlessly and better than ever.

Report Abuse - A new tab will be added to Office Exploit Builder which enables customers to report any abuse by fellow clients.

Any current customers need to email me with your HF UID, serial, email you paid with & what you have been using the exploit for.
This is because the database has been pruned to remove abusers and improve the overall experience of Office Exploit Builder.
Anyone that has already emailed me will be replied to when the new servers are online. PLEASE do not email me again, be patient.
Any new customers will be automatically added to the database without following the above steps.

The builder will be back online when the new servers have been set up, which will hopefully be tonight. The thread will re-open when the servers are up.
Update 6.2.0.0 should be finished by the end of the week.

I would like to say I am very sorry about the downtime of Office Exploit Builder recently.
I became extremely sick and have been stuck in hospital so I have been unable to work.
I got back today to see that the person who I bought the new servers from has scammed me and cancelled my service and disappeared with my money. :(

I have bought another server now and added everyone back to the database, so you should be able to access the builder again.
In the next few days I will be giving all customers a free surprise to apologise.

Honestly, after reading some of the reviews and what other sellers say on you, this product seems fishy to me. I am willing to buy it (the 130$ package) but I need to see if it really works and some warranty and not stop working after 2-3 weeks.
In that case, would you provide refund?!

Thank you!

To whoever willing to buy his tool: It might even be the best tool but think again twice when dealing with offensive people like him that negative rep you(he gave me negative rep for no reason), offend you and delete your replies

Unfortunately he's got support from higher members of this forum therefore he feels he can do whatever he wants.

Mon3y I am going to quote you on this comment you made.
Can you please justify why you banned my license? Does it go against your TOS that I gave +rep to other users? I need that clarification because I have written you several emails and PMs about it but you kept ignoring it.
I've been holding off writing a review about your product but if you don't justify banning my license for not breaking your TOS then I will go ahead.
Unless maybe you should add to your TOS that you can ban any license once you don't like a user.

I AM WAITING...

Check all their reputation and see what people really think of them.
If you can't follow simple rules and are an arsehole to me, you WILL get banned, I'm not afraid of you.

Do you really think you can abuse my product and ruin it for everyone else that buys Office Exploit Builder? Nope!

My loyal customers thank me for this because it provides them with a better service.

Update 6.2.0.0 should be finished by tomorrow night guys! It will also come with a FREE GIFT. ?

Thank you mate. My ToS is very simple to follow and they break it and then make me out to be the bad guy, it's not fair!
Mon3y Thank you for bringing this up. I have read your TOS again so I'll be sure if I should post this or not. I am going to attach a screenshot of my conversation with you so everyone can see the reason why you banned my license.
https://imgur.com/a/7knD3

Also everyone can check my reputation and see what you wrote when you banned me and gave me a neg rep which has nothing to do with your TOS.
If anyone should be banned, it should be you because on your TOS you mentioned
"4. The product may not be 100% FUD at all times (Max of 1-3 detections), I am constantly updating to remain FUD, but updates take time."
But your product never got below 4 detection on scantime. I have proof of that during our conversation and I can also attach them when you post another lie about me on here.
Let me advice you, it's better you put on your TOS that youcan ban anyone if you dont like his name or avatar. that way, no one will complain.

The builder is currently offline due to me migrating to a new, faster server. It should be back up later tonight or tomorrow - along with a big new update.

[b]SALES ARE STILL ONLINE - New customers can still purchase and receive their product but won't be able to access it until the server migration is complete.
I am closing the thread until the work is finished.
I hope everyone has a good weekend. ?
This I dont understand, it clearly shows that all you are interested in is just money. How can your builder is offline, you close your thread yet you still ask people to keep buying it? Other sellers who sell good working products close their sales thread and suspend their sales until their tool is working.
When you unhappy customers of your product complain, you immediately close your thread and say you're working on an update and after your update your tool is never below 4 detection scantime. Please what update are you working on?

I promised soon I will write a full review about your product and post my conversations with you for proof. Also another you should know, I don't really care about the reputation or if you'll get me more neg reps. I use them for nothing as I've never been interested in product vouch copies or freebies.

I would suggest adding Phantom Aboki to your ignore list, he broke multiple rules of my ToS and is now mad and is flaming my thread and making me out to be the bad guy because I banned him after countless warnings.

Office Exploit Builder is currently processing a huge update, version 6.2.0.0. There's plenty of things to look forward to. :)
I HAVE NEARLY DONE WITH THE UPDATE, IT SHOULD BE DONE BY TOMORROW.

Here's a list of what's happening (Green = Done, Yellow = In Progress, Red = Not Started): New, faster servers for the website & builder. - The website and builder will run a lot faster and smoother.

Database prune. - Removed a lot of abusers of Office Exploit Builder so our loyal customers can enjoy longer FUD times.

Complete re-code of DOC/XLS stub. - DOC/XLS exploit codes are being written again from scratch, higher & longer FUD rates.

Complete re-code of silent add-on stub. - Silent add-on code is being written again from scratch, higher & longer FUD rates.

Complete re-code of crypter stub. - Crypter stub is being written again from scratch, higher & longer FUD rates.

Improved features - I'm also rewriting the exploit, builder and crypter features to ensure they are working flawlessly and better than ever.

Improved security - There will be several security features added to Office Exploit Builder, such as better obfuscation to protect against leaking, blocking sites that distribute samples for longer FUD rates and much more.

Report Abuse - A new tab will be added to Office Exploit Builder which enables customers to report any abuse by fellow clients.

IF YOUR BUILDER IS NOT RUNNING - you need to email me with your HF UID, serial, email you paid with & what you have been using the exploit for.
This is because the database has been pruned to remove abusers and improve the overall experience of Office Exploit Builder.
All new customers have been added to the database and your builder will be working now! ?

Phantom Aboki - *June 19, 2017, 1:39 pm*

Thanks again. I told you that I will post more proofs if you keep lying about me.
Your message made me laugh so hard.
I have never flamed on your thread, I'm not an idiot and I'm glad there are records here to prove it.
Before I purchased your product, I posted on your sales thread 3 times because I wanted to know about the product and I wanted to hear reviews from other users. When I want to buy a product I care more about users reviews not the sellers grammar.
After buying your product I only post on your thread to ask why you're not replying to my emails and PMs because I sent you several. But you always have an excuse for not replying. Sometimes you say you missed the emails, you never got them, your server is down, you traveled... you always have an excuse.
So let me show proof of my posts on your thread so everyone will see if they are flaming.
If I send you several messages and PMs and you dont reply any of them but you always come to your sales thread and post things, wont that make me come to your thread and remind you that I sent you private messages? Is that flaming really? I paid money for something and if it dosent work I have every right to complain about it.

You can add me to your ignore list. Do you really think after banning my license for no reason that I will be crazy enough to waste another 100$
The only next time I can use your product again is if you respect your own TOS and unblock my license you banned without just reasons.

Here are proofs of what Mon3y calls flaming. Everyone should please take note of the dates on those messages and also the date I complained my license was banned. You will all notice that even after Mon3y banned my license I was still very polite and civil with him but he kept ignoring my emails and PMs.

Since you cannot provide one proof of me breaking your TOS or flaming on your sales thread before you banned my license, your sales are never going to get better.

Watch henceforth how much sales you'll make. I don't need to post further on your thread to discourage anyone, but your sales will definitely be affected.

Besides AgentTesla macro exploit is $12/month license, it works better and I get 1/35 or 2/35 detections scantime after refud.

Also iterator exploit was 100% better than yours and his was cheaper too.

It doesn't matter what you put inside, every executable file should work.

Macro builders build a script which executes the payload you've put inside (most of the time just a simple download + execute command).

So even if you put the Lego Bionicles game inside, it should still launch the installer.

Hello

Can your exploit work with my Netwire??? I would be interested to buy if it does

FearInflictor - *July 31, 2017, 9:03 am*
BUYERS BEWARE...
About a month ago I bought this builder, but it had 9 detections at the lowest (I tested every combination), usually more. I emailed him several times and he kept responding saying "I'm working on the update, it will be done tomorrow" or "it will be done by tonight". This went on for 2 weeks, until he finally posted and update, after I demanded a refund. Sure enough, the update did nothing, the crypter was still garbage, and the builder produced docs that were detected by Windows Defender (still at least 9 detections). I have emailed him 7 times in the past week and a half, submitted a support ticket, and comment several times, asking for a refund (that he assured me earlier) and this guy has not since responded ONCE. He also took away my subscription, so I can't even use the builder.

He ALSO went ahead and gave me bad feedback, saying he emailed me and replied, and to stay away cause I was flaming on his forum, which was a load of bullshit... He hasn't contacted me since his update almost 2 weeks ago, I was totally calm, patient, and civilized until now.

Anyone considering buying this... I will gladly share all of the proof with you.

FYI I didn't break any ToS, I wanted a refund because this product didn't work (it was detected by most antivirus). I asked him many times through email, I submitted a support ticket, and I commented on this post, yet he took away my subscription, then gave me bad feedback claiming I was flaming. He did so without responding to me once, yet he claims he did which is not true. (I will share all emails and proof if desired).

I urge you all to consider your purchase, and at least wait a few days at the very least... It may be fud right now but the last update "fud" only lasted for about 1 day, then gaining over 10 detections.
The crypter is trash (sorry but it's true, doesn't do shit) and the silent exploit... it's laughable. The silent exploit is just a vbs script (similar to a runnable exe). No person in their right mind will run a vbs script, unless it's a 90 year old lady using a computer for the first time.

Don't waste your money... I'm a student with very little money, and after buying this (when I realized it didn't work) I asked him many times, and he led me on for weeks saying he was gonna release a big update, and he promised a refund if it didn't work (once again I have proof). When I asked for this refund he blocked me, took away my access to the builder (the $130 package), and he gave me bad rep before I warned ANYBODY. I was calm and respectful but the bad rep really pissed me off.

If you want more information/proof, pm me. I will gladly share everything. This tool no doubt was valuable when OP made it almost two years ago, but now he is squeezing as much money out as he can, selling a tool that no longer works. Prepare for disappointment if you buy this product.

If you want more information/proof, pm me. I will gladly share everything. This tool no doubt was valuable when OP made it almost two years ago, but now he is squeezing as much money out as he can, selling a tool that no longer works. Prepare for disappointment if you buy this product.
If you feel you've been cheated, you should open a deal dispute or scam report and include proofs of it too.
Also I know this my post will be deleted by Mon3y shortly ??

I'm not the only one who got scammed, several people in this thread got scammed: https://hackforums.net/showthread.php?tid=5677655

Please don't buy this shit builder, it's not at all FUD. On the rare occasion OP updates this tool, (If FUD at all) the FUD only lasts a few hours before 10 or more antiviruses detect it.

if you want to waste your money buy this software, this is worst thing i have bought here. it actually used to work before but it was never fud. i was trying to reactivate my account from march, yes you red it good, march, and now its august, sending exactly 3 mails, few pms and at least 5 tickets that got deleted and i didn't get my account activated at all.
money will say i am a liar but i have all the evidence of stuff i have send to him to reactivate my account.
i strongly advise you to pass on this software.

As soon as someone post that he wants to buy, Mon3y will reply immediately but when someone email him for support he will ignore the person and claim to not see the messages.

On top of it, his exploits are pure trash . His silent add-on is just a VBS script, no one is stupid enough to download and run VBS Script. Even most email providers will mark it and block it as threat.
(Aug 7, 2017 07:11 PM)FearInflictor Wrote: [CITE] You obviously didn't read any of the proof OP posted, I too was scammed by Money... He may have once had a great office exploit builder, but now it's a shit product that is very quickly detected. Money is a total cunt, I lost $130 to that piece of shit. He promised me a refund if he didnt fix the builder, and I asked him for one after weeks of waiting. He proceeded to ignore me, block me, then give me bad rep before I said anything bad about him or his product. I don't even have access to the builder anymore. He claims I broke ToS which is total bullshit, he is a pathetic low life that sells an old product.

Money releases occasional FUD updates, but these fud updates only last a few hours, before the exploit is redetected by 10 or more antiviruses.

When you say you ban people because they broke your TOS I expect you will show just one proof of someone breaking your TOS before you banned them. Dont always use this excuse, anyone who complains about how bad your product is, you ban their license and say they broke your TOS. Any successful seller always welcomes criticism and learn to make their products better, but you're stuck exactly where you were 2 years ago.
I'ts just so sad that very few people still keep believing your lies. Everyone you've scammed has shown proof that you ban them for no reason and scammed them off their money. Where is your proof of someone breaking your TOS?
Do you even understand the meaning of the word "Scammer"? Check your dictionary kiddo.
By the way, keep deleting posts, it shows exactly who the scammer is.

It's not fair I know.. :(

My loyal customers know I work my damn ass off for you guys, and I always will.
Please be patient and I promise everything will be back to normal soon, I need to find the abusers before I release the next update.

Hopefully everything should be all good tonight by the latest. Keeping the thread closed until it's all done.

Yes of course, I'm currently working on adding even more encryption methods and it should always bypass Gmail. :)

Guys as you know I am totally re-writing the crypter, all new code from scratch (Which is why the update is taking longer than usual). If I don't finish the crypter by tonight I will release a reFUD for

the main code & silent add-on tonight instead and hopefully finish the crypter ASAP. :)

Bought "Professionnal" version a few month ago ... i admit it , this guy knows how to make mon£y.

Be careful ,you'll NOT get a .doc file but a VB file...good luck to spread a file like that ! and of course no refund is possible...

It's my fault , i was stupid enough to believe a 130$ fud exploit doc builder could exist.

Again , be careful.

No it's not ...if you build a file with silent add-on you'll get a .vbs file .

Very bad to see this guy can keep on going with this shit for years..
His silent addon plugin is indeed false advertised, you will recieve an .vbs file (Nobody is looking for that trash)
Be aware dealing with this user

If you are not a lying stooge for Mon3y. I need you to prove that you are enjoying this rubbish builder.

Show me on tv that yoou have it and then try bypassing the smallest of AV with it so I'll believe you

Phantom Aboki - *November 11, 2017, 8:52 am*

Finally admin has done something. The is one of the worst products on HF. It is never FUD, even after refuding it wont bypass any AV on runtime.
When you write to him about how bad his product is, he will stop replying to you and later ban you for no reason.
I dont see why anyone would even still show interest in this tool despite all the negative review. The only positive review here are from multiple accounts owned by him. We are not fools.

No wise person should waste his money on this anymore. If you do, goodluck to you and when you start complaining I will be the first to laugh stupidly at you.

Yes you are right. For me he ran away with my money, banned me and never gave me what I paid for. I paid for an FUD exploit builder with support but I never got any of that. So in my case, he is a SCAMMER.

Also his exploit dosent bypass any of the major AV.

Bypass Gmail..

Some vouches..

There's lots more vouches in the thread, just take a look!

Full feature list..
Office Exploit - Word AND Excel - Office Exploit Builder allows you to create a DOC or XLS exploit with MULTIPLE files hidden inside!

Easiest Spreading Method - Not getting the results you want while spreading? Office Exploit Builder makes spreading extremely simple.

Unique Stub Generator (USG) - Every build is upto 90% unique to ensure the longest FUD results.

Encrypted Links - Every link is encrypted to keep your files and information safe.

Both EXE & JAR files supported - No need to worry about what type of file you're using, because Office Exploit Builder supports it!

Add Text On Enable - When your target hits enable content, text will be added to the document to make things less suspicious.

Fake Message - Creates a fake error message when the document is opened.

Password Encrypt Doc/Xls After File Is Executed - Stops studying of exploit code if client notices anything suspicious.

TINY Stub - ONLY 34kb.

Unlimited Builds - Create unlimited BINs!

Silent Add-On - Maybe your target doesn't trust macros? With the silent add-on they won't need to hit 'Enable Content'!

Built-In Crypter - Encrypt your files before using Office Exploit Builder with the built-in crypter to ensure the best results possible. Crypter stub is coded in AutoIT and requires NO DEPENDENCIES!

Automatic Updates - Update your build with the click of a button, they're also FREE!

Template Tab - Free social engineering document templates to maximise your infection rate!

UAC BYPASS - The only Office Exploit around with a fully working UAC bypass!

FUD - Fully undetectable by all anti-virus'.

Hi Mon£y, i have a few questions to ask. 1, Is OFFICE EXPLOIT BUILDER one time click silent execution and don't make any UAC pop up or what so ever "macro/ python"? . 2, what is Fud ratio for OFFICE EXPLOIT BUILDER and also do I need to crypt my file before I use OFFICE EXPLOIT BUILDER?.

You're a scammer ... You ban me after 2 days because i was asking for what i bought : A silent doc exploit and NOT a stupid .VBS script.

EVERYBODY knows you're a scammer except new members .

After purchasing here is what the message i send to you :

...and your answer :

And after your answer : Ban !!! you call this "breaking many of my TOS" ???

A few weeks ago you were in trouble and you've been temporary banned (for scamming + fake accounts to create fake vouches) . Just before that here is what you sent to me :

Very kind isn't it ? I think it's a proof that i'm not a "dirty little scammer" trying to make him bad . He's lying all the time , i'm not.

Don't believe any vouches , they are fake . Don't believe him , he's the biggest scammer on HF .

You've been warned ...

...and if you need more proof juste search "Mon£y" on HF search engine ... You'll have a lot of stuff to read ! ^^

Dont deal with money..
This is not FUD (only scantime) The silent exploit its a vbs script
In my opnion this is just a scam (Look all comments in the past)

BE VERY AWARE DEALING WITH HIM YOU HAVE BEEN WARNED!

Hi,

Is this exploit really silent? or it generates vbs script when silent addon is used?

Please reply thank you!

You do realize that while this might be somewhat runtime FUD, if a vbscript is dropped on anyone's machine (that you are using for testing purposes with authorization) even Windows Defender will go haywire; thus defeating the whole "silent" aspect.

If you are baiting me to shill in favor of the author, move along because it won't work.

I just would like to receive what I paid for, and still no reply.

what doesnt seem to work? i bought the basic version and i get a doc file with macros, and i can even send it trough gmail without any problem. infact i asked to dev if i could upgrade packages, as i want my stub to be fud too.
please explain what issue youve had with it, or anyone else? people just think they get a program and its over, you need to learn how everything works. coz ive just heard random complaints, but i dont understand what doesnt seem to work.

so you had an issue with the product an made a scam report?
the devs can do anything they want, if you start acting shady on his regards ofc youl get a ban, this is the internet not some supermarket.
you arent going to gain anything from sales trashing. so just move on and forget about this. its been months now

Just to understand something, are you part of Mon3y support team?
You claim the file word exploit is FUD. Can you show us a TV proof that this will bypass any AV on runtime? You choose the AV and show us TV ession proof.

Hello I am interested in purchasing soon, but would like to know.
1,Would this crypt my exe and then add it to the doc or xls output?
2, What version of DOC or XLS does it work for?
3, Does this mean I do not need an extra crypter?
4,Would it work for native exes? i.e Webmonitor?

Trust me, it's not even close to a good product. Unless you intend to use it as a winrar archive. It will never bypass any antivirus and when you complain, he will ban you. Then you'll join the lost of people always coming here to say "Mon3y I sent you a PM/Email some day ago, please reply"

over $100. It's English man.
That how I bought your product and you also said I'm not your customer... LOL

You are one of the people spreading false information on here. You claim this tool works like charm. Please can you show us proof of bypassing any AV runtime with this? Opps, you can't. Because you'll PM later that Mon3y said you shouldn't. That's what everyone that vouches for Mon3y here does. They make false vouches but never show you proof, instead they tell you to buy it if you are interested. Can you imagine such advice, they want to scam you first before you realized the product isnt what you expected.
I have bought some products on HF which works fine, and you ask me to show you on TV how it works so you'll decide if you'll buy or not, I'll do it. That's why this is called a community, not a scam forum you've all turned it into.
Don't act dumb.

But this is a macro, not cve such as CVE-2018-0802 And CVE-2017-11882.
Just only MACRO.

Hi,Seller!
There was no word of "MACRO" in ur Post, am I right?
If i knew this is macro, I wouldn't buy it.

And everybody can buy macrosploit with $100 at here
There the price is cheaper and can refund if not satisfied.

If you are waiting for a scammer to tell you that he is a scammer or not, then go ahead and waste your money.
You're welcome to complain later.

You have not been scammed yet.
Here is the thing;
He will send you the product so be patient a little.
The problem you will encounter is that the product will never be FUD and it will never bypass any Antivirus on runtime. When you complain he will stop replying to your PMs and emails. When you write on his thread, he will ban your license and say you violated his TOS.

Later he will say you're not even his customer. So either way, you fucked up.
I'm sure you read all the complains on his thread but you felt we were just wasting our time. I'm happy for you bro, you just stuffed 130$ up your ass.

This is the scam report I opened about him. Same thing I complained about is what you'll face too.

I do not agree that i have not been scammed yet though.

I have... i bought a product, waited for a long enough time and did not recieve it.

If he hasn't got the time to manage it anymore he should stop selling it (read: taking money from people when he can deliver on time or at all).

He has been scamming people long enough now so he should be neg repped and get this over with, once for all.
In my case he delivered the product. But the product did not work for days after he delivered it. When it started working, it was never fud. I sent him PMs and emails but he kept ignoring them. When I decided to write on his thread (because I saw he preferred to write on his thread than reply to support emails) he banned my license and said I broke his TOS...lol

Maybe he is not online that's why you havent received your product yet. You will get it. But you will never enjoy using it, because it's useless.
For those people vouching for this products, ask them to show you proof on TV that this can bypass any AV on runtime, they will make excuses.

Whenever you send him a PM or email about buying his product, those messages never get lost to him. But whenever you Pm or email him for support after buying, he claims to never receive them and ask you to resend them again, and the loop continues. How pathetic.

This guy is always so quick to vouch for him and know when the host scammed him, maybe he is seller's deputy.
You claim his product is always FUD, can you show proof of that to any of the people interested in buying it? instead of just spreading lies. It's very simple, show proof on TV of this product bypassing any Antivirus on runtime. Words are cheap, actions speak louder.

Dont be deceived by the fake vouches. Most of the vouches are old. Before you buy this product, ask the people using it to show you proof on teamviwer if it bypass any antivirus.
Dont make the same mistakes that others have made and regretting it.
After buying this, the seller will ban your license and says you broke his TOS. How can you buy a product and it dosent work for you, yet he expects you not to complain.

Mon£y - *May 12, 2018, 12:14 pm*
For everyone that has had problems recently - I am trying to resolve it with you guys, please stop flaming on the thread and wait until I contact you. I was away for 3 days and because I never replied people have all jumped on the thread claiming I'm a scammer. I'm not a scammer and never will be, I wouldn't have been here since 2009 if I was, would I?
Please have some patience and I will contact you about fixing your misbeliefs.

that break my ToS multiple times and expect me to do nothing, I'm obviously going to ban you after warning you and you carry on. Some of of the complainers aren't even my customers and never have been - probably friends of you.
One of them called me a scammer because I was away for 3 days and couldn't answer - trying to resolve it with him now.

The person asking for a refund misread the product, he's getting a refund shortly.

It's not fair at all, scaring people away because they can't follow a simple set of rules or are extremely impatient. HF has really gone down hill..
I have hundreds of happy customers, why aren't they all calling me a scammer? That's because I'm NOT.

HF has really gone down hill because of people like you selling fake products.
You said I broke your TOS, I bought a product and the builder never opened for several days. I sent you PMs and emails which you ignored completely and when I wrote on your thread, you said I broke your TOS. When infact you banned my license because I gave +rep to someone you scammed. How was that any of your business.
I still have the email where you wrote that you will give me a refund but you never did.
I promised you that I will never stop exposing you and discouraging others from buying your product but you felt I was blabbing. It dosent matter how long it takes, I'll keep bringing you down.

Just so you know, HF rep dosent mean shit to me.

Another new account. His first post is a vouch for this product. It seems this seller just creates multiple accounts monthly and uses them to vouch for his product. This is because all his old customers already know that this product is a scam now and no one wants to vouch for it. Funny.

Someone would create an account just to buy your product? Maybe you feel we are all kids. I thought you have a website that accept sales and a support email. Why do they need to create HF account, and they will never post again after vouching for your product...lol

It takes just one click to send money, but he'll keep making you write messages back and forte.

You are new to HF and have just 7 posts, yet you already know a great seller.

If you want to vouch for a product, do so and shut up. But when you come out here to write all this bullshits, then it definitely shows you're very mischievous.

How many product have you even bought here? It seems you're only attracted to shitty products. You shame me bro.

Really???. I have been scammed many times by people like you i believe, shitty sellers. Does being new determine how many products I have bought over my time here on hf?. I am impressed with the way Money runs his business and from my experience with other sellers here, I give him my respect. What do you expect from a scammer? He never has any excuse from taking payment or responding to interested buyers. But after payment, you're on your own.

If you are concerned about runtime detection, don't waste your money. This does bypass any antivirus on runtime.
On scantime detection, it is never less than 5. Don't be deceived by the fake scan results he post here.

Everyone should just be careful though about the kind of vouches some people make just to deceive other.
This user posted that this is the best and after one hour later, he posted on another thread of similar product saying the other exploit is the best and the other seller is his number 1 seller. You can see below for his post on the other thread.

I still have paid you and it never worked and you made me waste a lot of time now checking I see you're still here you said you had problems but the softwer did not send it to me anymore. I had opened the tiket I hope to get it because I sent 130 $ BTC

Domynyo - *July 2, 2018, 8:50 pm*

Hey guys I don' t know why but this guy is not answering me anymore, he said me he has 3 different packages:

-The Starter ($70) builder creates a macro DOC/XLS document.
-The Corporate ($90) has the silent add-on, which is used to make that DOC/XLS silent, so no enabling content.
-The Professional ($130) package has both of the above and an FUD crypter, which is used to encrypt your EXE files before using the exploit. This will bring the best results.

I bought "Corporate" package, but I wasn' t able bypass gmail so I asked him wich one are the correct settings cause I managed used all different cominations with no result, I sent him another

message on HackForum (I tried making help ticket up his website he do not answer) he responds me on hackfourm he will add the silent add-on in the future? and sorry I am stupid I bought that ? I want a refound cause he didn' t say me the truth, that is not a SILENT EXPLOIT, so Dude answer the messages and give me the refund

I have warn him i will make sure him doesn't sell any more shit on HF and will report him webpage to be taking down. I have been contacted by 2 other ppl whom bought from him and they told me this dude is a big scam and a joke, the other guy said once he get back online he will say he have been sick or his mother just died of Aids.

This sales is a scam. I dont fucking need your stupid license or product but if i dont get my refund, i promise you will never sell again because i will publish you both in Google, Youtube, HF and make sure your site is closed. This is a promise, i warned you in my last PM to you but it seems to you like a joke.
I want my refund if that isn' t silent no way

Yes you are the dumbass for thinking you’re getting a true silent exploit for as cheap as $90.

OP has even told me, it’s a vbs file disguised as a doc, not a real doc file.

You should have asked him like I did

Domynyo - *July 3, 2018, 7:54 am*

I asked and that what he pm me that:

The Starter ($70) builder creates a macro DOC/XLS document.

The Professional ($130) package has both of the above and an FUD crypter, which is used to encrypt your EXE files before using the exploit. This will bring the best results.

He rated a thread one star, so we shouldn't buy the product?

That has nothing to do with the program itself.

The original Office Exploit Builder; and still the best.
Office Exploit Builder has been around since 2014 and still going strong. Why try anything else when you can get the best?
Recently I released the 6th generation of Office Exploit Builder, and it's features proved we are still way ahead of competition and aren't going anywhere!

Completely undetected..

https://spyralscanner.com/result/id/9XXPLA2AAPR6DR9DR11Y

Bypass Gmail..

Some vouches..

There's lots more vouches in the thread, just take a look!

Full feature list..
Office Exploit - Word AND Excel - Office Exploit Builder allows you to create a DOC or XLS exploit with MULTIPLE files hidden inside!

Easiest Spreading Method - Not getting the results you want while spreading? Office Exploit Builder makes spreading extremely simple.

Unique Stub Generator (USG) - Every build is upto 90% unique to ensure the longest FUD results.

Encrypted Links - Every link is encrypted to keep your files and information safe.

Both EXE & JAR files supported - No need to worry about what type of file you're using, because Office Exploit Builder supports it!

Add Text On Enable - When your target hits enable content, text will be added to the document to make things less suspicious.

Fake Message - Creates a fake error message when the document is opened.

Password Encrypt Doc/Xls After File Is Executed - Stops studying of exploit code if client notices anything suspicious.

TINY Stub - ONLY 34kb.

Unlimited Builds - Create unlimited BINs!

Tutorials - Professional step by step written and video tutorials available inside the builder.

Silent Add-On - Maybe your target doesn't trust macros? With the silent add-on they won't need to hit 'Enable Content'!

Built-In Crypter - Encrypt your files before using Office Exploit Builder with the built-in crypter to ensure the best results possible. Crypter stub is coded in AutoIT and requires NO DEPENDENCIES!

Automatic Updates - Update your build with the click of a button, they're also FREE!

Template Tab - Free social engineering document templates to maximise your infection rate!

UAC BYPASS - The only Office Exploit around with a fully working UAC bypass!

FUD - Fully undetectable by all anti-virus'.

what CVEs are you using to build?

why are you advertising that all versions of office are supported? you either have a 0day worth 200k USD or you are false advertising. which one is it ?
or maybe you don't understand the concept of an exploit :) having a user click "run macro" on your vbscript is not an exploit, same as a java driveby is not an exploit

it works fine... and the features such as password|fake error| and the rest is amazing..
i had issues compiling but i had to find my a work around it...
but it should work fine with your office..

i attached document to email and it worked.. i didnt send the email though but we all know gmail wont attach if perceived as a virus..
Good one OP

I think the seller is just trying to get stuff together (just a feeling). He's got some pretty good vouches and i did a Lotta assignment before deciding to purchase from him. Sent him an inquiry mail to which he responded politely but he's been AWOL since. I went ahead and paid nonetheless and till now I haven't gotten the product either but i'm not fazed or baffled though.. I think we just gotta wait for him to come around which I guess he'll do eventually according to vouches and my assignments....

I Just think it's only cool and fair to give us a lil bit of update on the current status regardless if a delay is involved... Cos, there's some people rooting for you...

You cannot make this fud. I have bought from him the first version Life time pack and him don't licensed again the product.. because I break the rulls when I post on his thread to tell the people to not buy it. is a big waste of time and money. You will be never refunded and if you request the refund him will ban you because you have break the rulls.

my crypted file from your crypter is not executing....am using netwire

pls kindly fix

the exploit is showing runtime error, your recommended uploading link is not working,so i had to buy host to host the file and its always showing runtime error and after that it will show compile error

pls kindly fix

you dont want to answer my email....honestly am not happy because nothing is working for me...the crypter is not working for me and the exploit is not also working with my upload link telling me runtime error.
still you refuse to provide a recommended uploading link since the uploading link in the exploit is no longer working and any other uploading i used refuse to work with the exploit.

Also, I already told you that the reason you're file isn't executing is because of where you're hosting your file.

You need a file host that supports direct links.

Hey, this stuff has never worked since almost 5 months i purchased this, when i try contacting you, u keep mute, but always post an update here which does not have any impact on the said software, kindly fix this stuff via team viewer or return my money. Stop running around if u thing u knows ur stuff works. Its too bad watching a fellow guy man cheating others on a place like HF. Its too bad.

He rather responds when you post here or when you ask questions about purchase thats not nice

also i have never seen him online on skype too..... so you mean it has never worked for you? like no need to keep trying?

I told you the problem is where you are hosing your file, I even sent you a link hosted on my cpanel so you can test and it worked great.
YOU MUST USE A FILE HOST THAT SUPPORTS DIRECT LINKS.
I am also releasing private hosting site for Office Exploit Builder customers, it is almost finished. Should be here in a few hours. :)

why you don't reply me for months?
I want my refund for this shit product

infomationss1 - *November 27, 2018, 10:05 pm*

I have bought a "LIFETIME LICENSE" of this exploit since "15th of July 2018", not working, no support from you, nothing! nothing!!, and when i tried contacting u for the last time yesterday, u started telling me that u have reduced my license to a "1 month license". Please, if you are not ready to offer me the working version of this license as you claimed, please kindly refund my money. I have never seen this exploit working since my first purchase on 15th July 2018 till date. Kindly refund me, i dont want to have issue with you, you can still go with some blind people on HF, But for me, i have understand that u only use this stuff to earn a living, and not to satisfy people's need.

GOOD LUCK WITH YOUR SALES.

is this SCAMMMER is still aroung?
people, read desputes before you buy

Naz6uL - *November 28, 2018, 1:34 pm*

So it`s seems unfortunately I`m just another fool / victim among many others... I purchased a lifetime license on 31/08/2018, I had a lot of problems like not informed updates, internal license issues and many other you may use to justify this lack of support and reliability of this product...

And what now, I opened a ticket, tried to reached you on jabber and finally PM you just to get this answer from you:

"Due to heavy abuse license's now expire after one month, I can give you 50% off a new license if you want to reactivate."

It's not right what I have done with me and it seems with so many others...

I post this right in your sale thread because you even already disable us to PM you...

So refund my money, it`s simple.

I hope you realize how wrong you are acting like this and learn how to appropriate deliver and support good products.

Honestly I can't figure out how there are so many shitty reviews, when in reality this tool is working just fine and its probably the best one for its price. Maybe if you don't break the ToS which you have right in the Tool and it specifically says not to break, you guys wouldn't be posting here every 2 hours complaining, but enjoying this fire tool instead.

Honestly, I bought it like 4-5 weeks ago and haven't had any problems to this day. I had a small problem with the updater but the OP fixed it quickly through email. Vouch for this product, it really works and does what its supposed to do!

Why is it that all these people giving a good review / vouches are new accounts created on or after 11-20-2018?

I have paid your via PM2BTC, and have sent to you approximately $145 without seeing this stuff working. Even when i tried exposing your product, you pleaded to fix it and disappeared all of a sudden, you even went ahead to turn off your private messages, so that nobody will contact you. Now that am back to take my money back, kindly refund my money back, or you leave the lifetime license i paid you without using it so that it can waste that way, then you trying to take extra money from me in the name of giving me your worthless exploit on a 50% discount. I am waiting for your responds, otherwise, i will open a fresh scam report on you.

You`ll really keep acting like this? deleting the negative comments against your product?

You did deactivate your PM for several days once I ask about my lifetime license purchased on 31/08/2018.

Stop deleting the comments and start acting responsible for your acts, refund my payment.

In your dream, the lifetime license i paid you about 3 months ago expired? I never knew that lifetime license ends withing 3 months even without working. I have own a lifetime license of IM, Data protector, Cyber Seal, Byte Crypter, Etc for almost 4 years and still, they are up and running. But your fucking rotten OFFICE EXPLOIT BUILDER lifetime license ended within 2 to 3 months, what a big scam. HF admins should know what to do to this guy, otherwise, many people would still fall a victim and still loose more money.

1- your crypter in exploit is doestnt work.
2- Your exe upload link is doesnt work

You connected and saw the errors on yesterday. And we try my other laptop too, so its not about my pc.
We did tutorial steps when you connected and the same problem.

Why you dont connect again for fix this fault ? I did all of tutorial steps. and no result.

I just want connect to my laptop again and exploit my exe. Exploided file dont make connection to rat. i just want to your fix this problems.

This is my REAL Review of this software from this user :mon3y

Jabber/xmpp : mon3y@exploit.im

I purchased this software thinking it would work fine, but its not even starting.
I have payed 110 dollars for nothing, its a crap software

I tried on Virtualbox and it did not start, i have wasted weeks to get it to work.
I tried on VMWARE, the software started but its not working with any rat
And i have asked him multiple times for help and he does not help
he always responds very late, like hours or even days later.
Does not help get it to work

his software is very outdated and does not have proof of working with any RAT
He even mentioned that he does NOT use any rat himself
This seller does NOT say on his thread that its for one month or one year , but people think they buy for one year !!!
His software does not work at all with diferent RAT''s software

i have tested with different RAT, nothing works

When i ask for help he does nothing
He has blocked me on jabber/xmpp

I do NOT RECOMMEND anyone buy this exploit from him !!!
He dont want to give my money back and is very rude !!!

DO NOT BUY, YOU WILL LOSE YOUR MONEY !!!

DO NOT BUY, YOU WILL LOSE YOUR MONEY !!!This review is 100% fake and a lie.
I was the one who told you to switch to VMware and transferred your license so you've proven yourself wrong there already.
I always replied to you and was willing you help.

You are only saying all of this because your license expired, you didn't read the thread before purchasing and you assumed the license was one year when the thread clearly states it's one month.
You are being extremely childish, lying and making someone look bad because you didn't thoroughly read my thread before purchasing? Grow up.

If anyone has any doubts after reading this fake review, please message me and I'll send you a test document.

HaRDBit3S - *February 6, 2019, 2:35 pm*
So why did you block me, scammer?

Yeah right scammer, how is this dispute fake and a lie when your software does not even work with any rat?
You never even tested a working connection with any rat and you even admitted that you dont use that.
I have asked so many times to for help but your always away or respond hour/days later.
You already have one deal dispute and im here to confirm the same thing.
I have asked nicely for a refund but you refuse.
If you just gave my money back it would me better.
But you scam people with a crappy software. I dont even call this a exploit.

Its not about the license, if you can read anyways.
You dont even mention on your thread for how long it is.

Your software does not work with any rat and you dont show proof of that.
Its outdated and your thread is just a copy paste from years ago.

How dare you to call that a fake or lie.
You are the fake here.

You are the fake here.The software works perfectly with any .exe or .jar file, doesn't matter what it is.
I always helped you and you know I did, so don't lie. I've NEVER taken days to respond, maybe hours when I'm sleeping yes.
It's not my fault you're too stupid to follow some simple instructions or read and understand my replies to your queries, is it?
Give your money back for what? You paid for a month and you had the license for a month.
You had plenty of time to ask me for help and I would have happily come and helped you.

If anyone has any doubts after this bunch of lies then please message me and I will give you a test document.

I evaluated many things before writing here.You're obviously another complete idiot. Calling me a scammer when you've not even dealt with me? How childish.
I do not want your money, keep it. I don't need more idiots to deal with.

Qualities of a scammer, he changed username 59 times - Thats Insane !I'm actually laughing at how pathetic you are.
So.. Let me get this straight, you claim I'm a scammer because I sent you an old video because I didn't have time to make you a brand new one?
I was busy updating the builder and supporting REAL customers, and it still works in the same way, so why would I?

You've NEVER used my tools and never will, so how would you have a single clue what they're like?

You do realise you can look on my profile and see my last username change date don't you? It was before I started selling Office Exploit Builder in 2014.
If I really was a scammer, why would my account still be alive 10 years after I registered? Yeah I've been a member since 2009, selling Office Exploit Builder since 2014, two threads with over 400 pages and HUNDREDS of vouches, but I'm a scammer? Makes sense. ?

Hello, was wondering if i could use this on different boxes? Or am i only allowed to use this on one file to execute one computer?

What RAT do you recommend I combine this with?

And is your Crypter FUD? Or should i purchase a different crypter?

I asked him nicely to remove the flaming and I will reactivate his license and come show him everything on teamviewer, so guess what he did? Yep, came and flamed some more. People are so stupid sometimes. ?
Making a dispute now.

What do you mean by this? Can you get execution without having the victim click on anything? If yes, are you using the CVE for office 2016 ?

Hello, you said "The Professional package comes with an FUD crypter for your .exe files!". I have Revcode WebMonitor rat, is the crypter Native? because Revcode WebMonitor i can only use Native crypter and not .Net. I currently have Cyberseal which supports Native rat, can I use the Starter plan with your office exploit would still be fud even thou i use CyberSeal to crypt? secondly,

after 1 month i will be paying $25 for the starter plan right? Also what you mean by Silent Add-on? sorry i have too many questions, just want to get the facts right before i purchase

Has Money resolved your issueThere was never an issue, his license expired, simple as that.

Now he's calling me a scammer because it expired, doesn't make any sense, right? ?

Will be releasing an update very soon, lots of fixes and reFUD of everything, fresh encryption methods etc.

Got a few things to fix with my host first, will be fixed tomorrow.

EDIT: Host has been FIXED! Builder and site are now running perfectly. ?

Thread has also been edited to include update log.

Update will be released shortly, will open the thread when complete.
