This is a very very short anime, each episode is about 2-3 minutes, so you should be able to watch all the episodes back-to-back in about 30 minutes. Overall while a quick series, it leaves quite a comedic impression, implementing different twists, humorous quirks, and other fun surprises that I will let you guys figure out for yourselves. Definitely worth the time watching it, so hope you get to it and enjoy it as much as I did ;)

It's short but still a great watch. Enjoyed every segment of it.
