Hi HF,

I need advice related to shared hosting package from HF host.

I wanted to know if you have a good experience with any offshore hosting, shared package can you please suggest.

My requirements are pretty simple :-

1. Need to host a blog(wordpress) regarding songs
2. Website uptime from host time is important
3. DMCA ignored

Important :- Songs will not be directly uploaded to the host, just links will be there to file hosting sites.

I wouldn't purchase offshore shared hosting off HF, just due to the fact that a lot of HF hosting services end within 1-2 months.

Offshore VPS' on the other hand would work well since VPS' are usually only offered with companies who can afford to purchase servers. You can see some offshore VPS' here:
