Thread: [Crawl a website for SQLI vunerable links?](#)

joepvand - July 1, 2016, 12:53 am

Is there a tool available to scan a website e.g "example.com"

example.com isnt vunerable, but example.com/subdirectory is

How can i scan a entire website for something like that?

?ULL - July 1, 2016, 12:59 am

There are tools that will do this, i forgot what they are called.

Maybe try these?

A nice tool for this task whould be soooo helpfull!

barrass - July 6, 2016, 12:15 am

Try Vega or Acunetix maybe..
