Thread: [Arbitrage setup \(pre live/live\) High % payouts](#)

Hoco - July 1, 2016, 4:44 am

Hello everyone.

If you are looking for a method that i'd be selling, then i'm sorry to disapoint but thats not why i'm here! :)

Arbitrage isn't a new method and it can be applied to numerous markets with great results when applied correctly.

I work specifically with sports betting, all kinds of markets.

I have came up with a setup that allows me to rack up a nice % in profit with each operation but most importantly, it prevents me from loosing my invested money/winnings/ if a house decides to either ban me or block my odds (wich some do).

Important to mention that if that scenario presents itself, i will still be working on those houses no matter what.

What im looking for is a couple of people to invest in the project, agree with me on a specific % of profit and a specific time frame where i will be allowed to work with their money.

This, without the risk of loosing the initial investment or profit.

We could be legally bound if that would make anyone feel safer.

Any questions?

Reply to the post, send PM or ask for skype. ?

Cheers

Edit1: Added specifics.

(Jul 1, 2016 05:16 AM)php Wrote: [\[CITE\]](#) Arbitrage is a vague title. What you're talking about is high risk gambling.

Are you asking or?

This is no high risk gambling, as hrg is mostly done with huge bankrools, always betting considerably high in hopes you will get through the mud and rack a profit, as known as (luck)

johnchung - July 1, 2016, 8:22 am

Its a bit hard to invest in something that we have no idea what you are doing. From the looks of it it's gambling.

Fair enough :)

Got to make that point come across better in the post.

This is all related to sports betting.

Arbitrage = the simultaneous buying and selling of securities, currency, or commodities in different markets or in derivative forms in order to take advantage of differing prices for the same asset. (For the noobs)

You signed up recently, and do not have much trust on this forum so it will be hard for people to trust, but GLWS

Thanks for that :)

True, but that's why i specified the possibility of legally binding it all together.
No need for trust in me, just in the setup.

The risk is on the bookies. They do not like people do arbitrage on them. They can easily detect these activities.

Agreed! But diferent bookies deal with it in diferent ways.

I make sure to work just with those who might ban your account but not your balance, or those who just reduce your odds.

Arbitrage is very popular although you may need some bank balance to make a decent amount of profit.

Recently I used all the sign up offers in the euros and i've made a few grand, although personally takes up too much time.

Hey!

You do need a bit to work around with in an effective manner, that's true.

Depends on the system you had in place but i'm glad it worked out for you!

Hey.

Never have.

I just work with sports betting.
