I wish I could but unfortunately BO3 is not a game that transfers to Xbox One. So far the games I know transfer are:

Advanced Warfare
Ghost
Black Ops 1 (Even with godmode classes)
GTA5

Well everyone rockstar has just ruined one of their greatest features that made them unique to any other game. You can no longer transfer accounts between devices, it's not longer a feature for accounts made from here on out. Mods or no mods, you just get an error now. Refunding my most recent last GTA customers now that aren't xbox. Hopefully rockstar changes this back to normal because honestly not just because of mods but I think that was a really interesting feature they way they created a type of medium for devices. Anyways, still doing everything else just GTA is only for xbox now as well. ?

It was on a TTG thread. Out of respect for HF I won't post the link publicly even though it's not really

a competing forum. The thread was made one day and 4 hours ago and the guys goes in depth about everything he tried and how it has nothing to do with modding. ?

EDIT: So to be quite honest, I guess we don't really know if its 100% by rockstar for sure and could just be some kind of temporary problems. Let's hope it's temporary.

I'm very sorry I didn't answer your question. I know it's possible but it has something to do with how legit the profile looks. I don't know what the stats need to look like but I know it's something like keep it under \$500 Million to be safe and it has to have like 10+ hours of game time or something like that, other than that you will get the error every one is getting. You may want to look more into it because I've found multiple things on the internet but not sure if any of it's true. The only reason I am not sure is because I actually can't test this because I don't own a next gen console, not even interested in one until an RGH type deal comes out, and I don't feel like making account after account for someone to test. If it was like a CoD recovery it wouldn't be that bad but with GTA (I assume that's what we're talking about here) each account takes so long with the prologue, online tutorial, and race against Lamar.

I have actually have used a gamesave before but when testing transfers I prefer not to cheat the game in any way and do minimal things you aren't suppose to just to be safe. I'm online and taking orders for the day if anyone needs. ?

ToXiiC - November 13, 2016, 12:02 pm

Just got our website up, consoles online and ready to go. If you want GTA to transfer to next gen your character must be 45 days old and I can only give you 500 Million and rank 125 to be safe. PM me to get your recovery or if you have any questions or concerns about this service. ?

VDGamingFTW - December 17, 2016, 11:16 am

My Skype is VD_GamingDZN HMU I can do \$10 for GTA

ToXiiC - December 24, 2016, 11:57 am

I still own my modded console and this service still stands. I haven't been on in quite a while because I was locked out of my account but I just wanted to let everyone know that you can definitely still buy this. I see some users on here charging \$50 and I didn't even know modding still got sales like that. My prices will remain what they were, I don't see how prices in the market go up as the games get older that makes no sense to me so I will stay firm with my original prices or if I do raise them it won't be more than \$25-30 I can assure that, but for now just \$10. As for GTA accounts, right now I don't have any that I let sit for 30 days as required for it to transfer without errors so at the moment I can only do GTA accounts for people who are playing on 360 and have not transferred to next gen yet. Your account MUST be at least 30 days old for this to work. Please do not try to make a fresh account on 360 and message me with the details thinking that after I do a recovery it will transfer. I will start making accounts now and if the demand is really high (seems so with people selling for \$50) and I get a lot of requests, I'll start buying old accounts off people but then I'll definitely be forced to raise my prices if I have to buy accounts. If none of this makes sense to you, feel free to PM me for more details. ?

Thanks for the vouch! Online and selling to anyone who is interested. Just a reminder of the games that transfer to xbox one:

COD: Black Ops 1

COD: Advanced Warfare

COD: Ghost

Basically any game that lets you transfer stats to next gen.

For GTA on next gen:

I only have 1 account available I'll let go for \$25. I'll have more accounts available in the future but unfortunately I have to let these accounts sit for 30 days to pass through rockstar's new transfer checks so that you won't get an error when trying to transfer to next gen. If you want your OWN account to be modded it will have to NOT BE TRANSFERRED yet and still on 360 and have to be more than 30 days old.

Here are what the features would look like....

For people transferring to next gen: [\(Click to View\)](#)

\$600 Mill

Rank 200

All unlocks

*I won't do modded rolls or anything to special just to be sure it will transfer.

For people staying on 360: [\(Click to View\)](#)

It's on the main thread

Yes, only if your account is more than 30+ days old or it won't work. Also if you are transferring to next gen I can't add more than 200 rank or \$500 Mill to make sure it transfers without errors.

Thanks a ton for the vouch!

Just so everyone knows, this was a next gen transfer and was the last account I had that I mentioned in my last post on this thread. I will be obtaining more somehow. The ONLY thing holding me back from having more in stock is the fact that the account has to be 30+ days old. I have been making accounts so that in 30 days I'll for sure have accounts and also been asking around for accounts that I'll most likely buy from people. Long story short, I'll have more transferable accounts in stock soon. ?

Bought a premocked account from the user. He was extremely helpful and responded to all my messages and helped me through any problems I had. I highly recommend that you buy from this user!
