Thread: [thales' 3k post / almost 2 year feedback thread](#)

thales - July 2, 2016, 1:42 pm

Yes this is exactly my 3,000th post. Been through some good times and bad times throughout my time on hackforums and met some cool people. After being repkilled for a suggestion thread I've learned my lesson to not play games. I still remember my first rep/thread I made. I made a thread providing homework services in the ewhoring section. Boxy then neg'd me saying something along the lines of "the ewhoring section is not the place to offer your homework services". I first joined to try to find some hacking tools or something (I was a skid). Found hackforums through sythe.org and ended up being banned on there due to asking for hacking tools on here. Decided to stay on hackforums and the rest is history.

I originally won l33t in a contest for unupgraded members. After staying l33t for the majority of my time on hackforums someone randomly bought me ub3r after I was approved (shoutout to whoever that was can't remember).

Hackforums stuff:

Lounge: So much lq shit and spam.

Beginner hacking: First place new people come to ask for someone to hack an account for them.

Marketplace: Some hq stuff such as og accounts and all that but filled with crap like ebooks and methods. Shame there are so many scammers too.

SSRP: Agree with me or I'll neg you.

Marketplace discussions/investment strategies: Teach me how to invest my \$7.23 so I can turn it into \$500,000 please.

Appraisals: Please appraise my account that's worth \$0 but I think it's worth \$100's.

Reputation: Means something but at the same time doesn't mean shit.

Awards: Wow you have a lot of awards you must be very hq.

Random site feedback:

Bustabit: Pretty neat and unique site but when you hit a train of losses you might as well just give away your bitcoin. Shoutout to blackshadow for scripts.

Satoshimines: Bullshit.

Primedice: Even more bullshit than Satoshimines.

Speedtest.net: Thanks for telling me my speed.

Amazon.com: love u

Coinbase: Good wallet. Thanks for holding all my bitcoin.

Instagram: Memes and girls

Snapchat (not really a site) : Underage sexting

Games:

Csgo: I'm pretty shit at this game but it's fun. Skins > skill

League of Legends: My main shit, love LoL. Toxicity central though.

Overwatch: Love this as well. So many awful 12 year olds though.

Runescape: 20 year olds merching.

[Ethereum](#): One of the coolest dudes I've met on here. Hope SPX goes to shit and Bitcoin goes to the moon so you and I can make some mad cash stacks. When you move to the US we'll start our investment firm ?

If you'd like me to leave feedback on you, just leave a comment and I will add it if I feel like it :) Also, I'll update this if I think of anything else.

Nice feedback thread even though you didn't really go into specifics about HF. I see that I'm already 200 posts late but keep it up ?
