Thread: [\[FREE\]\[NEW\] Dr. Plagues Crypter Help Desk! \[AskYourQuestionHere!\]](#)

Dr. Plague - July 2, 2016, 7:12 pm

Hi guy's! I am Dr. Plague if you guy's have seen me around. If you guy's want help with creating a "FUD" crypt, need icon's, need setting's, etc. Just ask them here or PM me! I will be on almost 24/7 to help, so ask your question's!?

Here is my crypter review thread if you wanna check it out! - [Thread!](#)

Wanna learn how to crypt LL? Go here! - [Thread!](#)

frankokoye - July 2, 2016, 11:34 pm

I use LL with Ghost crypter, it works fine, but with atmos botnet, it kills the stub after crypting, I do not use any special setting on it while crypting botnet, yet it kills the botnet stub.

Any help on that?

Any help on that?

Do you have everything "Unticked" in the botnet? Try that.?

h4ck3rs4l1f3 - July 3, 2016, 9:08 am

What crypter should I buy?

Dragon Crypter looks interesting to me but I don't know if it is a good choice.

Could you tell me what crypter I should use?

(I use DarkTrack 4.0 Alien)

Thanks in advance! ??

I am online and accepting question's!:))

cretid - July 3, 2016, 10:54 am

I'm new to this all, but there's this other thread that I saw you're involved in

I can't post the link because I haven't posted 50 times yet, but it's the "[Free] CryptEx" one made by ByteKnight

It's a free crypter, but I'm just not sure how to download it.

Help?

Look on his thread. I am sorry I will not give you a download link as that's what that security is put there for!?

cretid - July 3, 2016, 11:35 am

Alright. Thank you

No problem!?

oliver10 - July 3, 2016, 2:00 pm

Hi I am using LL and I am trying to crypt with ghost crypter. I followed your Tutorial:

hackforums.net/showthread.php?tid=5326420 But when I place the crypted file on my other PC it doesn't auto startup you have to click on the crypted file in order to make it run. Is there another setting I needed to do?

Stomedy - July 3, 2016, 2:01 pm

Vouch for this guy, he knows his shit.

Dr. Plague - July 3, 2016, 2:05 pm

Are you sure you had all the settings right? If so, I will report into this to scorpion.?

oliver10 - July 3, 2016, 2:17 pm

LL Settings:

http://prntscr.com/bodus5

Ghost Crypter Settings:

http://prntscr.com/bodv41

I'm pretty sure that the settings are correct.

Toscan - July 3, 2016, 2:33 pm

How do I get rid of GEN detections? I'm using Exe Protector and I have many GEN detections.

Thanks in advance brother!

Make or clone a assembly. Then use a HQ icon!?

oliver10 - July 3, 2016, 3:02 pm

No. Im testing on a laptop with windows 10.

It's a free crypter, but I'm just not sure how to download it.
Help?
Decrypt it

1 Question. Im not good at coding and have tried to learn it but i find myself just giving up! (Not a good attitude i know xD)
Just wondering if there is an easy way to create a crypter and making it FUD?
Also i know that in ur signature it goes to GhostCrypter but is that ur most recommended?
Thanks :)

TheTwitchTerror - July 3, 2016, 7:21 pm

Hey man glad you made a desk seen you around HF and very HQ :). I plan on getting cloud crypter soon and use luminosity was wondering if you know the optimal settings?

Who me or him?...?

frankokoye - July 3, 2016, 9:29 pm

(Jul 3, 2016 08:26 AM)Dr. Plague Wrote: [\[CITE\]](#) Do you have everything "Unticked" in the botnet?
Try that.?

I wasn't the one that created the stub, I have tried to ask the person that did it for me to untick everything, he said that's how it comes, I should just crypt.

Is that supposed to be true?

Well a lot of people just look at the flashy stuff. There's a lot of people who blindly trust rep and awards, and are very skeptical when people lack it.

Varane - July 4, 2016, 10:01 am

Huge vouch for this amazing shit.
